On Thursday, the 8th inst. came on the trial of Samuel Horman and Llizabeth Eaton, mother of Samuel Harman, on an indictment for the murder of Margaret Harman, wife of said Samuel Harman.

The prisoners plead not guilty. David Casset and James Kelly, Esqrs. were appointed by the Court as Counsel for the prisoners. John Stroman, jr. Esq. Attorney-general, on the part of the Commonwealth. Verdict of the Jury, Elizabeth Eaton, guilty of murder in the first degree; Samuel Harman, in the second. In this case, it is very remarkable, that the mother and son should be both tried and convicted, for the preparation of a crime at which human nature shudders.

The evidence adduced was voluminous, and, much to the credit of the Witnesses, was given in the most impartial manner. The amount of the evidence was, that Samuel Harman, the husband of the deceased, dragged Margaret Harman, who had been confined by sickness. to her chamber, by the hair of her head, out of bed, with one of his hands, holding a psalmbook in the other, dashed her face several times on the floor, and kicked her in the side. To complete the tragical scene, Elizabeth Eaton dragged her out by her hair, beat her, and exposed her to wet and cold in the yard. The deceased had nearly all her hair pulled out of one side of her head, and many severe wounds and bruises, which terminated her life on the 27th Feb. last.

It appears, from the testimony given on this trial, that Samuel Harman was infatuated with a belief that his wife and mother in-law were witches; and that he was hewitched. He was advised to call on George Eisenhart, who pretends to be a Necromancer, and to have control over witches, and who has for a long time been permitted, with impunity, to impose on the simple credulity of the superstitious. The result of the interview with this notorious imposter was, that Harman was bewitched; and one of the witnesses says, when he came home from Eisenhart, he declared that his wife, the decessed, and his motherinlaw were witches. Another witness says that Eisenhart told Harman that his own mother was the witch.

If Harman was told by Eisenbart that his wife and mother were witches, and if that induced Harman to commit the murder, Eisenhart is not innocent of the crimes that followed, and contributed to the wretched condition of the unfortunate

President Franklin, after delivering a sol mn, impressive, and most elequent address to the prisoners, pronounced the awful sentences, which are, that Samuel Harman be imprisoned in the Penitentiary house at Philadelphia, for 18 years, 5 of which in solitary confinement. The dreadful sentence of death was passed on the unfortunate Elizabeth Eaton.

> IMPRESSMMNT. From the National Advocate.

The following documents are worthy of attention, as illustrating practically the subject of impressment.

I, Beekman Ver Plank Hoffman, of the town of Poughkeepsie, do certify that I am a lieutenant in the United States' navy, that I was on board the Constitution frigate in the action and capture of the Guerriere; that after surrender, I was sent on board, and after taking out the crew, fired and blew up the ship. That eight impressed American seamen were among the crew of the Guerriere, who were liberated at Boston. I was also on board the Constitution in the action and capture of the Java, and was sent on board that vessel, and after the crew were removed, set her on fire and blew her up. Amongst the crew of the Java, thirteen impressed American seamen were found, three of whom had entered the British service and were left, the other ten were liberated as Americans.

Dated Poughkeepsie, 7 April 16, 1813. B. V. HOFFMAN.

Duchess county, ss. Richard Tompkins, being sworn, saith, that he is a native of new Paliz, opposite Poughkeepsie; that he sailed from Wilmington about the 28th of April, 1810, on board brig Warren, Wm. Kelly, captain, for Cork. On the homeward passage, in September following, he was impressed and taken on board the Peacock, a British sloop of war; and compelled to do duty. That while on board that vessel he made many unsuccessful attempts to write to his friends, informing them of his situation. He further saith, that after he had heard of the war, himself and two other impressed American seamen, who re on board the Peacock, went aft to the captain, and claimed to be considered as American prisoners of war, and refused to do duty any longer. They were ordered off the quarter deck, and the captain called for the Master-at-Arms, and ordered us to be put in irons; we were then kept in irons about 24 hours, when we were taken out, brought to the gangway, stripped of our clothes, tied and

whipped, each one dozen and a half of lashes, and put to duty. He further saith that he was kept on board the Peacock, and did duty, till the action with the Hornet-after the Hornet hoisted American colors, he and the other impressed Americans again went to the captain of the Peacock, asked to be sent below, said it was an American ship, and that they did not wish to fight against their country. The captain ordered us to our quarters; called midshipman Stone to do his duty; and if we did not do our duty, to blow our brains out-' aye! aye!' was answered by Stone, who then held a pistol at my head, and ordered us to our places. We then continued at our places, and were compelled to fight till the Peacock struck, and we were liberated after an impressment of about two years and

is a subject of interesting enquiry, what Literary works our deceased countryman has left behind him. He was engaged, we know. in an extensive historical work; but we have not yet heard in what state he has left it. Those who have it in their power ought to gratify the curiosity of the public in this and other matters connected with the life of Barlow .- NAT. INTEL.

[Translated for the Philadelphia Gazette.] From a French paper of the 10th March: Biographical notice of Mr. Joel Barlow, Minister Plenipotentiary of the U. States of

America near the French government. Mr. Barlow was born in 1755, in the town of Reading, in the state of Connecticut. He received an excellent education, and shewed at an early age a decided preference for the belles lettres, which he has since cultivated with great success, and to which he owes a share of that glory which will descend with his name to posterity. He was still engaged in his studies at the period of the rupture between England and her colonies. Young Barlow possessed too much elevation of soul to remain an indifferent spectator of an event which involved the dearest interest of his country. He appeared several times as a vo. lunteer in the field of honour, and his companions in arms, umong whom were four of his brothers, did justice to his patriotic zeal and In 1778, he took the degree of bachelor of

arts, and applied himself to the study of the law, in the leisure moments which the events left at his disposal; however he engaged in a different career from that of the bar. He accepted the place of chaplain of brigade, that was offered to him by the state of Massachusetts. It may be observed, that among the Presbyterians of New-England, the priest-hood is only a kind of civil ordination. He who receives it may engage in other avocations, and it is not uncommon to see young men preach the gospel, in order to procure the time and means necessary to qualify them for another profession

In his new capacity of Chaplain, Mr. Barlow followed the army until the conclusion of peace in 1783. It was during this tempestuous period, that he sketched, and, in a manner, finished his beautiful poem of the Columbiad, which secured him an honorable station

amongst the eminent poets.

He had married in 1781, Miss Baldwin of name; a woman, as distinguished for the su-periority of her mind as for her amiable quali-ties, and who was worthy of the husband she

When the independence of the U. States was acknowledged, Mr. Barlow went to Hartford, where he recommenced the study of the law. In 1786, he was admitted to the bar, where he distinguished himself in such a man-ner as to attract the notice of his fellow-citi-

In 1787, he published the vision of Colum-bus, or the Columbiad, of which we have already spoken. The merited reputation of this poem soon spread from America to Europe, and it was even re-printed in London a few months after its first publication.

At this time, a company of very respectable men, with the greatest part of whom he had been acquainted in the army, bought from Congress an immense tract of land, situate on the banks of the Ohio. It was proposed to sel a part of these lands to foreigners, and to divide the rest among the members of the com-pany. Mr. Barlow was requested to assist in the execution of this project, and to proceed for that purpose to Europe. He consented to it the more willingly, as the voyage was in perfect consonance with the liberality of his taste and with the desire which he had long cherished of seeing and studying the long celebrated countries of the old continent, whose genius had brought all the arts to perfection Soon after his arrival in England, he went to France, where he attended with success to the interest of his employers. The establishment, of which he became one of the first proprietors, was begun in 1788, and increased so rapidly through the influence of the America colonists, that in 1812 it contained a population of 280,760 souls. The state of Ohio, admitted among the members of the federal union, now forms the seventeenth province of the Ame-

During the first years of the French revolution, Mr. B. resided in London, where he published different works, remarkable for the depth of his views and the merit of their style, which procured for their author the applause of statesmen and of men of taste. Mr. Fox himself gave testimony to the talents of Mr Berlow, and pronounced his eulogium in the House of Commons.

A special mission to the French government carried Mr. Barlow back to Paris in 1792 : it was at that time he had the henor of being made a French citizen, together with his countrymen, Washington and Hamilton. Political and commercial affairs caused his presence for some time in the north of Europe, and he soon after received from the American government a most important mission to the coast of Africa. After surmounting many obstacles, he succeeded in concluding advanta-geous treaties with the states of Algiers, of Tunis, and of Tripoli, and in delivering his fellow citizens who had long groaned in captivity. This was one of the periods of his life, the recollection of which was always most agreeable to him.

These negociations being ended, he returned to France, where he resided from 1797 until 1805; he then quitted France and went to England, where he embarked for the United States. On his return to his native country, he was occupied in projects of public utility, and published the last edition of the Columbiad, the most magnificent specimen of typogra-phy which has ever issued from the Ameri-

and there to finish his honorable career. In 1 1811, the present President of the U. States. Mr. Madison, appointed him Minister Pleni-potentiary near the French government. Monot avoid remarking, that it is not a little strange that the first Biographical sketch of the life of Barlow has been published in a land. We had thought such a lungs carried him off suddenly, at Zirnow, land. We had thought such a lungs carried him off suddenly, at Zirnow, land the all those who by his fellow-citizens, and by all those who are capable of appreciating the union of genius

As a statesman, Mr. Barlow has rendered essential service s to his country; as a man o genius, and a friend to humanity, he does ho nour to his age; as a man of deep research, he has left works which will always be sought after by true philosophers; as a poet, he has signalized by a great work the rising literature of his country; his glory will exist as long as the language which served to illustrate his

In private life he possessed all the essential qualities which could contribute to his own happiness and that of the persons by whom he was surrounded. Having attained by his merit the exercise of high offices, he was free from the ridiculous weakness of some men, who affect to despise literary success, without which they would still have remained in impenetrable obscurity. He spoke of his works without pride and without false modesty. The strokes of his wit flowed frequently from a sprightly disposition. His judgment was always correct and just. Under a grave and perhaps austere exterior, he concealed an ardent and feeling mind. His openness invited confidence. Unshaken in his attachments sincerely beloved by all those whom he admit ted to his society, he has left universal regrets and it would be utterly impossible to describe the grief of his wife and family. She has los the object in which all her affections centred. There are losses for which no earthly consolation exists. If any thing could assuage such piercing sorrow, it would be the thought, that the memory of Mr. Barlow is dear to all good men, and that the remembrance of his virtues and talents will never perish.

Secretary of War, Washington. Head quarters, York, capital of Upper Canada, April 28th, 1813. SIR,-After a detention of some days by adverse winds, we arrived at this place yes. terday morning, at eight o'clock commenced anding the troops about three miles westward from the town, and one and a half from the enemy's works. The wind, was high and in an unfavourable direction for the boats which prevented the landing of the troops at a clear field, the scite of the arcient French fort Taranta. It prevented also many of the armed vessels from taking positions, which would have most effectually covered our

landing-but every thing that could be done

The riflémen under major Forsyth first landed, under a heavy fire from Indians and other troops. .Gen. Sheaffe commanded in person. He had collected his whole force in the woods near the point where the wind compelled our troops to land. His force consisted of seven hundred regulars and militia, and one hundred Indians. Major Forsyth was supported as promtply as possible; but the contest was sharp and severe for nearly half au hour, and the enemy were repulsed by a number far interior to theirs. As soon treated to their works. Our troops were now formed on the ground originally intended fortheir landing, advanced through a thick wood, and after carrying one battery by assault were moving in columns towards the main work: when within sixty rods of this, a tre-mendous explosion took place from a magazine previously prepared, and which threw out such immense quantities of stone as most seriously to injure our troops. I have not yet been able to collect the returns of the killed and wounded; but our loss will I fear exseed one hundred; and among these I have to lament the loss of that brave and excellent officer Brig. Gen. Pike, who received a contusion from a large stone, which terminated his valuable life within a few hours. His loss will be severely felt,

The troops behaved with great firmness and deserve much applause, particularly those first engaged, and under circumstances which would have tried the steadiness of veterans. Our loss in the morning and in carrying the first battery was not great, perhaps forty of fifty killed and wounded, and of them a full proportion of officers.

Notwithstanding the enemy's advantage in

position and numbers in the commencement of the action, their loss was greater than ours especially in officers. It was with great exertion that the small vessels of the fleet could work into the harbor against a gale of wind, but as soon as they got into a proper position, a tremendous cannonade opened upon the enemy's batteries and was kept up against them; until they were carried or blown up. tuation of gen. This is a correct calculation. It must be highly gratifying to the American people to see their government taking such decisive and manly steps for their protection. Naturalized citizens need not be under apprehensions of the Prince Regent's crael orders being carried into effect, when they find the government of their adoption so ready to enforce their power of retaliation. The readiness with which O'Neale was delivered up on the representation of the people of Havre-de Grace, shews very plainly, notwithstanding admiral Warren's pretended ignodare not carry their threats into execution.
