I offer myself to your consideration as a candidate to represent you in the nex. Congress of the United States. It is possible the curious may be disposed to inquire, why I have become a candidate without the sanction of a committee? To this interrogatory, I answer, that the recent method of nominating candidates by committees, however highly I may incline to appreciate the practice, is, ne. vertheless, as it seems to me, no way prehe has obtained licence to follow the business of | ferable to the ancient custom, which eye. wise indebted to said estate, are requested to a Public Auctioneer, in the ninth collection dis. ry one understands. Again, I have been induced to declare myself at this time, and in this way, by request of my friends, who think with me, it is the wish of a majority of the Freeholders of the District. If, however, we should be mistaken in this particular, whatever the result may be, I will cheerfully submit to, when fair portunity of making a selection, and all I ask, is an unbiassed expression of public opinion, This manner of proceeding appears perfectly congenial with the first principles of our government, with all our political institutions, and consequent. ly can be liable to no rational objection .aiming the public credit, by laying duties on va- proper to premise, that I trust my deportment on this occasion will be found fair

Mr. Bacon says, that by this machine 24 sheets per minute, or 1440 sheets per hour, may be struck off.

We have also notice of another patent machine, for printing, which is quite ready, and to require less room.

It cannot be doubted, but that these improvements must be highly serviceable to the art of printing, and particularly to the

FROM CASTINE.

The gun-brig Curlew had been sent to Dighy to await the orders of Sir JOHN SHERBROOKE for the evacuation of much of the depredations committed on 4. The territories on this side the Castine. Preparatory to which measure Gen. Gosselin was embarking the cannon, gunpowder, &c. SAVANNAH, MARCH 23. The British at their old tricks-again.

United States' gun vessel No. 63, John Hulbert, commander, left this port for St. Mary's on the 13th instant. A gentleman who was on board, writes to his friend in this place from Cumberland, dated March 18, 1815. "On the even. ing of the 16th we fell in with his majes. ty's brig of war Erebus, capt. Bartholemew, who ordered us to send our boat on board or he would sink us instantly. We did not comply and he accordingly firedinto us, which damaged our sails and rigging severely. Mr. Hulbert immediatey returned the fire and then struck his colors. The British commander afterwards made an apology and permitted us to proceed. It appears that he was yet smarting under the wounds he received up the St. Mary's river, in the expedition against Clark's mills. We had no one hurt on board the gun vessel, but a musket ball was evidently discharged at Mr. Hulbert, as it passed within a few inches of his breast. Although the captain of the Erebus was politely informed by us who and what we were, and that we had dispatches for Admiral Cockburn-hereplied, that " he did not care a damn for that-we must either send our boat on board or be sunk"-But mark the cowards ly John Bull! FROM THE MILIGARA FRONTIER.

Williamsville, N. Y. March 14. The Peace has been celebrated in all parts of the United States, with a splendor becoming the occasion. On this frontier there have been frequent balls, in honor of the pacification. The one of Friday last, held at Pomerov's, Buffaloe, was attended by several officers of the British army on the Niagara: and the blue and red coats mixed in the dance with great satisfaction.

We are informed from a highly respectable source, that when the news of Peace, reached Fort Niagara, the English were preparing an expedition against our frontier, of from 5 to 7000 men and that the operations would have commenced in a few days. We mention this so that every one may duly estimate the fortunate

arrival of the Olive Branch. Illuminations have not been attempted on this frontier; having formerly been matter of more serious consideration, than exhibitions of gaiety. The illumination of December 30, 1813, will be long remembered.

NEW YORK, APRIL 5. MELANCHOLY EVENT. LOSS OF THE SCHOONER SURPRIZE.

It is with extreme regret, we have to give publicity to the following painful recital, which is furnished by one of the of-

firers who came un vesterday. The Surprise, containing the crew of the U. S. sloop of war ERIE, sailed from N. York on the morning of the 3d instant, for Baltimore; and at half after 6 o'clock the same day, she struck on Barnegat Shoals. We immediately commenced throwing every thing overboard to lighten her, and run anchors out astern with the hopes of getting her off; but all our exertions proved ineffectual. At half after 12 o'clock, we cut away her masts. It was at this time that we discovered she had bilged, and was full of water fore and alt, the sea increasing and the wind blowing fresh from the S. E. making at times a fair breach over her---We then thought it most advisable to land as many of the crew as possible from our two small boats; but on attempting to approach the land, the surf ran so high that it was impossible to land them. At 2 o'clock, we lost sight of the wreck, and at day break fell in with the Virginia. Ann, from Fredericksburgh, who took on board and brougt us into port. By this simple but admirable invention every physician, and indeed every family, may be fur-nished with an elegant and delightful method of applying heat. It is not attended with the diffi. the lowest terms possible for cash. Those who culty and delay inseparable from any of the ordinary methods heretofore discovered: It may be put into operation in five minutes, and applied | the following articles : o a patient in the most helpless condition, seated a chair, or lying on a couch, sofa, cet, or bed used without water; the heat being conveyed n the vapour of burning spirit, produced and ransmitted by means of a tabular tin stove : The legree and duration of the heat can be regulated with the greatest facility, and applied to a limb, or to the whole body, with equal convenience. The Apparatus exclusive of a light wooden frame for supporting the bed clothes, does not weigh more than three pounds, and, when packed up, may be commodiously carried in a pair of saddle-bags

Physicians of the first eminence have bestowed the highest commendation upon this valuable mprovement in the application of heat, and many patients have already borne witness to its salutary powers. Its utility, however, will be sufficiently obvious to every one who knows how much the skin is concerned in the preservation of health, and the production of disease; and how frequently the latter depends upon a general deficiency of healthy excitement, or, upon the loss of its ba-lance and an undue determination upon some internal part of the system.

Each Apparatus will be accompanied with " A Plain Elementary Explanation of the nature and cure of Disease, predicated upon facts and expevience, and presenting a view of that train of thinking which led to the Invention," together with amale Directions for using the Buth in every case, by which intelligent persons will often be enabled to apply it with advantage, without the advice of a physician. It will, therefore, be sufficient here to say that in certain states of every form of disesse, the judicious employment of this excellent invention will be found to be a powerful, safe, and pleasant remedy. In those violent affections of the throat, head, and breast, which have prevailed in different parts of the country, it has been used by Dr. Jennings, and others, with the FAMILY BIBLES, POCKET BIBLES, SCHOOL happiest results.

It may not be superfluous to add that Doctor-Jennings is a gentleman of the most respectable standing in society, and of high reputation as a physician; and that in his efforts to diffuse this fruit of his labors among mankind, he is actuated much more by feelings of benevolence than by any desire of prountry emolument or professional

Subscriptions will be received at the Post Office and other places in Shepherd's Town, Martinsburgh, Charlestown, and Harper's Ferry; and as soon as possible after the demand shall have been escertained, an adequate number of the Apparatus will be provided. #### To the Public.

THE Subscriber has undertaken to aid Doctor Jennings in supplying the community with his Patent Portable Apparatus for administering the Warm and Hot Bath.

By this simple but admirable invention every physician, and indeed every family, may be furnished with an elegant and delightful method of applying heat. It is not attended with the diffi culty and delay inseparable from any of the ordinary methods heretofore discovered: It may be put into operation in five minutes, and applied to a patient in the most helpless condition, seated in a chair, or lying on a couch, sofa, cot, or bed: it is used without water; the heat being conveyed in the vapour of burning spirit, produced and transmitted by means of a tubular tin stove: The degree and duration of the heat can be regulared with the greatest facility, and applied to a limb, or to the whole body, with equal convenience. The Apparatus exclusive of a light wooden frame for supporting the bed clothes, does not weigh more than three pounds, and, when packed up, may be commodiously carried in a pair of saddie-bags.

Physicians of the first eminence have bestowed the highest commendation upon this valuable improvement in the application of heat, and many patients have already borne witness to its substary powers. Its wility, however, will be sufficiently obvious to every one who knows how much the skin is concerned in the preservation of health, and the production of disease; and how frequently the latter depends upon a general deficiency of healthy excitement, or, upon the loss of its balance and an undue determination upon some internal part of the system.

Each Apparatus will be accompanied with " A Plain Elementary Explanation of the nature and cure of Diseuse, predicated upon facts and experience, and presenting a view of that train of thinking which led to the Invention," together with ample Directions for using the Buth in every care, by which intelligent persons will often be enabled to apply it with advantage, without the advice of a ysician. It will, therefore, be sufficient here to say that in certain stares of every form of discase, the judicious employment of this excellent invention will be found to be a powerful, safe, and pleasant remedy. In those violent affections of the chroat, head, and breast, which have prevailed in different parts of the country, it has been used by Dr. Jennings, and others, with the

It may not be superfluous to add that Doctor ennings is a gentleman of the most respectable | Company. cian , and that in his efforts to diffuse this fruit of his labors among mankind, he is actuated much more by feelings of benevolence than by any desire of pecuniary emolument or professional

Subscriptions will be received at the Post Office and other places in Shepherd's Town, Martinsburgh, Charlestown, and Harper's Ferry; and as soon as possible after the demand shall have been ascertained, an adequate number of the Apparalus will be provided. Important Notice. A law was passed by the General Assembly o pany for making a TURNPIKE ROAD from the square in the town of Boonsboro', in Washington county, to Swearing n's terry, on the Potomac, opposite to Shepherd s-Town, in Virginia, under the name of the Boonsborough Turnpike Road Compuny. The distance is about one motes, and the road leading from Battamore unites with it at Boonsborough It is the opinion of the b st judges, that it would not cost more than seventy ousand dollars, to make the said road complete; and there can be no doubt but it would greatly add to the interest of the present Stocknolders of the Baitimore and Frederick Turnpike

standing in society, and of high reputation as a Tue many advantages to Baltimore from makng this short road, is obvious to all acquainted with that part of the country, leading into a most fertile and well cultivated valley in Virginia, with numerous merchant mills, from the best authori y, not less than 60 to 70, all within 15 or 10 miles of the ferry, which would be a great inducement as well as the wish of many more along that extensive valley to send their products o Baltimore. If this short road was made many

other advantages might be added. The law directs that subscription books be pened for a capital stock of \$80,000, in shares of \$20 each, at the following places, viz. at Boonsborough, under direction of Henry Locher, jun Ezra Slifer and John Adams. At Sharpsburg, (n Washington County) under direction of Geo. Smith, J.cob. Mumma and George Hedreck. At Swearingen's Ferry, under direction of John Blackford, John Brien and Thomas Buchanan. At Frederick-Town, under directio of John McPherson, George Baer and Joseph Swearengen. At Baltimore, under direction of Francis Forman, John Van Lear and James Cal-

that subscription books will be opened on the first Monday in May next, at the house of Maj. ### THE NATIONAL DEBT.

Several of our friends having expressed a wish to see a correct statement of the public debt together with its increase since the declaration of war, we addressed a letter to a friend at Washington, who has politely favored us with the information, we rejoice therefore that we have an opportunity of correcting the many false assertions which have lately been made ed; our union and republican institutions in the neighboring districts by the opponents of the government, where it has unblushingly been told to the people, that it exceeded one hundred and forty millions. Subjoined to our correspondent's letter we have given a list of vessels captured by the navy of the United States ! Extract of a letter from a gentleman in

Washington to the editors, dated March 17, 1815.

of our treatment while prisoners of the British, certify and say, that we were 80,934,023 | captured at the sortie from Fort Erie on the 17th Sept. Our number, including privates, amounted to about one hundred and eighty. After our capture, we were marched to Fort George, and were three days on the road, during which time our rations were served out raw, and we had no means of cooking them. Upon our arrival at Fort George, we were torced, officers and men, into a miserable guard house, having no hammocks, nor bedding of any description, infested with vermin, and where the mud was over our shoes. Here we were kept four days and nights. Here again our rations were served out raw, and but miserable means of cooking them.
