At that instant the horrid warwhoop was sounded in the ears of poor Colter, who, urged with the hope of preserving his life, ran with a speed at which he was himself surprised. He proceeded towards the Jefferson Fork, having to traverse a plain 6 miles in breadth abounding with the prickly pear, on which he was every instant treading with his naked feet. He ran nearly half way across the plain before he ventured to look over his shoulder, when he perceived that the Indians were very much scattered, & that he had gained ground to a considerable distance from the main body ; but one Indian, who carried, a spear, was much before all the rest, and not more than a hundred yards from him. You have just entered into that state which is replete with happiness, or misery. The issue depends upon that prudent, aniiable, uniform conduct, which wisdom and virtue so strongly recommend on the one hand; or, on that imprudence, which a want of reflection, or passion may prompt, on the other. But, as there is no wish nearer to my heart, than that you may ensure all that happiness, which the union of virtuous persons is capable of bestowing; and as the best sometimes err for the want of previous reflection upon that line of conduct which is invariably to be pursued, how can I render you a higher service, than by presenting you with that advice, which the warmest affection suggests. My experience, as well as my solicitude, my fond hope of seeing you] happy and beloved, even self-interest, for your happiness must now constitute the and I trust most useful.

Determined to pursue the establishment of their rights, as long as by any possibility they can be pursued through the paths of peace, they have acquiesced, as the message of the President at the commencement of the present session of Congress has informed you, in that policy of Spain which has hitherto procrastinated the amicable adjustment of these interests; not from an insensibility to their importance to this union, nor from any indifference to the object of being upon terms of cordial harmony with Spain ; but because peace is among the dearest and most earnest objects of their policy; and because they have considered, and still consider it more congenial to the principles of humanity, and to the permanent welfare of both nations, to wait for the favorable operation of time upon the prejudices and passions opposed to them, than to resort to * the unnecessary agency of force. After a lapse of thirteen years of patient forbearance, in waiting for the moment when Spain should find it expedient to meet their constant desire of bringing to a happy and harmonious termination all the conflicting interests tetween them, it will need little additional effort to wait somewhat. longer with the same expectation The President deems this course even more advisable than that of refering the questions depending between the two nations to the arbitrament or mediation of one or more friendly European powers, as you have been authorized to propose. The statement in your note of the 10th of February, in reference to this subject, is not altogether correct. It is not the British Government which, on this occasion, has offered; but your government, which without first consulting or asking the concurrence of the United States, has requested the mediation of Great Britian. The British Government, as must be well known to you, have it should be requested by both parties; and have communicated to the government of the United States this overture on the part of Spain. The President has thought proper, from motives which he has no doubt will be deemed satisfactory, both to Great Britian and Spain, to decline uniting in this request. He is indeed fully persuaded that, notwithstanding any prepossessions which the British government may heretofore have entertained with regard to any of the points in controversy, they would have been entirely discarded in assuming the office of a mediator. But it has hitherto been the policy, both of Europe and of the United States, tokeep aloof from the general federative system of each other.
