THE GRAVE. HELEN DORMER.

BY ROBERT JOSSELYN.

For the holy men of praise and prayer, Who have dwelt so long in the pleasant air, And sunshine of their God.

Why go the learned and wise.
To a house so cold and damp to the sound and the mystle skies, Nor watch the sins as they fall and rise, Nor read by the midnight lamp.

Why go the rich and gay
To a hut so menn and small?
No chance is there for a proud display;
There is scarcely soom in the walk of clay
For the busy worms to crawl.

But for him who struggles on In wild ambition's race; Who feels that the goal cannot be won— That his spitts droop and his strength is gone— This a quiet resting place.

As for him who has weary grown
Of a world that loved him not,
Whose joys have vanished, whose hopes have flown,
Whose only wish is to be alone,
Indeed, 'tis an envied spot!

A THRILLING STORY PROM THE NEW YORKER. Memory! undying memory! would that I could forever extinguish its light within the stricken chambers of my heart! Would that I could consider the past but as a hideous dream, and obliterate it from my existance! But no—it cannot be! the agonizing events of the past are written in characters indeliable—too deep for obliteration, are its traces of anguish on my soul. Deeply interwoven with every thought of by-gone years—of happiness and sorrow—is the memory of Helen Dormer; ay, even now, when the impress of age is enstained on my brow, and sorrow and disappointment have rendered callous a heart once glowing with all the sensibilities of nature, yet at glowing with all the sensibilities of nature, yet at glowing with all the sensibilities of nature, yet at the mention of that name I again feel the warm current of affection rushing through my voins, and again in imagination I worship at the shrine of beauty in all the ardour of youth's impassioned devotion—the peerless beauty of Helen Dormer. Her's was that flying loveliness which sheds a halo on all around—so free from earthliness—pure, which and gloridum as Worner when the first bright and glorious, as Woman when she first dawned on Eden to be a beacon light to man, ere Sin had flung its blighting curse over creation. But words are too weak to paint the lineaments of beauty—the soul subduing loveliness of that peerless and ill-fated girl. Let me onward with I saw a little cloud rising in the western horizon. In a few moments it spread over the expanse of heaven, and watered the earth with a general shower. I saw a little rivulet start from a moun-

my story.

Helen Dormer, the first love of my youthful Helen Dormer, the first love of my youthful heart, was the only child of a purse-proud haughty citizen, who thought his boasted wealth gave him an immeasurable superiority over those who stood in the more ordinary ranks of life. The gentle affections of the heart—the social ties of iriendship—were sentiments with which his stern unbending nature claimed no sympathy. Far different was the gentle nature of his daughter; kind and affectionate in her disposition; feelingly alive to the happiness or misery of her fellow-creatures, the exquisite creations of art—the works of gentlus—the soul-stirring beauties of nature—these were tain, winding its way through the valley and mea-dow, receiving each tributary rill which it met in its course, till it became a mighty stream bearing on its bosom the inerchandize of many nations, and the various productions of the adjacent country. I saw a little seed dropped into the earth.— The dews descended, the sun rose upon it: it started into life. In a little time it spread its branches and became a shelter from the heat, 'and the fowls of heaven lodged in its branches.' I saw a little smiling boy stand by the side of his mother, and heard him repeat from her lips one of the sweet songs of Zion. I saw him kneel

branches and became a shelter, from the heat, 'and the fowls of heaven lodged in its branches."

I saw a little smiling boy stand by the side of his mother, and heard him repeat from her lips one of the sweet songs of Zion. I saw him kneel at her feet, and pray that Jesus would bless his dear parents, the world of mankind, and keep firm from temptation. In a little time I saw him with the books of the classics under his arm, walking alone buried in deep thought. I went into a Sabbath School, and heard him reasoning of 'righteousness, and temperance and judgment to come unto me,' in a few moments afterwards, I went in the sanctuary, and heard him reasoning of 'righteousness, and temperance and judgment to come.' I looked, and saw that same uncl. Her hair was whitened by the frosts of winter, and on her cheek was many a furrow; but meakness sat on her brow, and heaven beamed in her dim eye glistening with a tear; and I thought I saw in her tear the moving of a mother's heart, while she reverted to lays gone by, when this Boanerges was first dawning into life, hanging on her lips to the voice of instruction; and inquiring in childlike simplicity the way to be good and I said, This is the rich harvest of a mother's teil:

The hour and the scene subdued me, and the The hour and the scene subdied me, and the fairy fabric love had erected, grew less firm, and gradually crumbled to decay. A melancholy nusic seemed rustling through the branches above me, and the hallowed stillness of the hour deepened to solemnity, the murmer of the breeze which played among the rich foliage around me. How played among the rich foliage around me. How solemnly impressive is the calm and beautiful hour of twilight. And Oh, how vividly do the visions of departed years—when life was fair and bright, ere the heart's best hopes and warmest feelings were chilled and hlighted beneath the withering of disappointment and sorrow—how vividly does the magic glass of fancy present those earlier and brighter days to our view! Curls may be arranged, fine tortoise shell combs fixed, sparkling ear-rings hung, splendid garments of the plants of A shuddering sensation thrilled through my veins as I contemplated, in silent awe, the glories of the mystic hour, and a boding spirit whispered the possibility of the hopes I had cherished proving fallacious. Filled with apprehensions the most alarming, I hastened onward, and the next moment I stood at the dope of the manning. displayed, and yet perhaps the gay fair one's mind may be poisoned with conceit, troubled with rivalry, and kept on the torture by ignorance and vanity. Anguish was pictured on that brow which seldom relaxed from its wanted severity which seldom relaxed from its wanted severity, while, in answer to my liasty greeting, he only said:—"Cursed be the hour when, for sordid lucre, I sacrificed the happiness and life of my only child." Need I paint the uncontrollable agony wrought by this unexpected address? The utter despair, when I found the flower I had hoped to watch over with fostering tenderness, forever blasted by the hand of the destroyer? Was it for this; I mentally exclaimed, was it for this I braved the pestilential gales of the Indies, to win wealth and fame only that I might cast it at her feet—and now to find her dying. Ay, it was true. I had returned but in time to receive the last sigh—to whisper in her dying car the words of unchanging love. The sensitive mind of Helen Dormer had sunk under continual anxiety and the alternate threats and persuasions of a stern misguided father. No stratsgem had been left untried, no art neglected, to turn the current of her affection in another channel—but in vain. She was true to her early love, and gave her life a EDUCATION.—In our country, all political power is in the hands of the people, and it has been well said by one of our wise men, that "The whole people must be instructed in the knowledge of their duties, they must be elevated to a contemplation and comprehension of those great truths on which alone a government like ours can be successfully conducted; and one hope of arresting degeneracy, or suppressing the insurgent passions successfully conducted; and one hope of arresting degeneracy, or suppressing the insurgent passions of the multitude by the influence of here and there an individual, though he were wise as Solon, or Solomon, would prove as fallacious as an attempt to stop the influx of malaria by sprinkling a little chloride of lime along the creeks and shallows of the shore, if the whole ocean, in all its depths, were corrupted."

was true to her early love, and gave her life a sacrifice on the altar of constancy.

In bitterness of spirit I knelt beside her dying bed, and prayed that I might be spared the pang

of losing her on whom my all of earthly bliss depended. "Charles," she murmured, when the first shock of our meeting had passed,—"add not a pang to the bitterness of this hour by unavailing sorrow. I am about to die, love; but why should I fear death when he comes in the form of a deliverer. Sorrow and suffering have for years been my companions; yet for thy sake, I would that my days might be lengthened but the blessed precepts of our holy faith teach us to look beyond dissolution. Religion has power to remove the darkness which clouds the sepulchre. As the pensive moon arises to supply the place of the religion shine on-the mind darkened by affiliction, and consoles the heart for the fost splender of unreal happiness. Fainter waxed the voice of the dying girl, and in a voice scarcely audible she whispered, as I gently bore her to the window, that the evening breeze might cool the fever of her brow, "thus love, may it shed its influence around your path. May you be happy in the possession of this priceless pearl long after the voice which now asks it is stilled in death, and the heart which now throbs at the reflection is silent forever. But I am cold Charles," she said feebly, "and a faintness like that of death oppresses me." A sudden hectic tinged her cheek: a slight convulsion of the himbs and she was no more! Writhing with the dark feelings of remorse, the father pressed his lips to the cold and stamp brow of his only child. The flinty rock was L'ength struck with the sharp pang of remorse, and his proud heart overflowed with parental tenderness and sorrow. He stood silent, steadiastly gazing on the victim,

the chilling breath of unkindness; in the lone mansion of the dead sleeps the pale daughter of beauty till time shall be no more. I still linger amid the scenes hallowed by the remembrances of my early love; but this heart will soon cease its fearful strife, and in the bright spirit land I shall be united to her from whom the frail chains of moral existence for a brief while divide me.

THE AMERICAN MECHANIC .- Whatever may be the 'pomp, glory, circumstance,' of the great men of the world—whatever may be the dazzling pageantry of high life—the glitter of fashionable society, and splendid misery of those who believe that "Those who think must govern those who toil;" there is no situation more enviable than that of the plain American mechanic-free for every thing for which Heaven designed him; un-trammeled in his opinions, and left to the guidance of his own genius he walks erect in the full stature of a man. Earning, with his own hands, the means by which he supports himself; protected by a government, which, like the sun, sheds its light—its fostering care upon all; who shall gainsay his right to enjoy the fruits of his labor, in the way which best please him? Under our government, prudence, industry and economy, are sure to meet with their reward, and it should be remembered by every mechanic, that the road to Bonerges was first dawning into life, hanging on her lips to the voice of instruction; and inquiring an from thee the inspiration came."

Once more I sought the presence of her I said. This the rich harvest of a mother's to interest of his probably was sown in weeping; and your groy hairs shall not be brought down with sorrow to the grave, but in the bower of rest, you shall look down on him who 'will arise and call you be besed,' and finally greet you where your hope is swallowed up in fruition, and prayer in praise.

Don't be Proud.

Don't be Proud.

Don't be proud! We will not say that abject him in the swall was own minust have some notion of his own importance, or else every one, tinding him ready, will give him a kick. But then, don't run into the other extreme, especially if you are poor. Pride has starved more than the himself competent to act on famile. Never be too good to do anything that is honest—saw wood if you can't drive a trade, and break stones on the turnpike if you can't saw wood.

quiet, sober moments of life, and add together the two ideas of pride and man, a creature of a span high, stalking through infinite space, in all the grande r of littleness. Perched on a little speck of the universe, every wind of heaven strikes into his blood the coldness of death, day and night, as dust on the wheel, he—rolled along the heavens, through the labyrinth of worlds, and all the system and creations of God are flaming above and beneath. Is this a creature to make to himself a crown of glory—to deny his own flesh, and to mock at his fellow, sprung from that to which both will soon return? Does he not suffer? When will soon return? Does he not suffer? When he reasons, is he never stopped by difficulties? When he acts is he never tempted by pleasure?—When he lives, is he free from pain? When he dies, can he escape the common grave? Pride is not the heritage of man, humility should dwell with frailty, and atone for ignorance, error, and imperfection.—Sydney Smith.

RICH AND POOR .- The rich have the most meat. the poor the best appetite. The rich lie the softest—the poor sleep the soundest. The rich have delicacies—the poor have health. The rich are afraid of losing-the poor have nothing to lose, and so, in this respect, have nothing to fear. The rich dread the midnight robber—the poor have no apprehensions of being robbed. The rich hang themselves through fear of poverty—the poor laugh and sing, and love their lives too well to put their necks in the noose.

The Pulpir.—The pulpit must stand acknow-leged, while the world shall stand, the most im-portant and effectual guard, support and orna-ment of virtue's cause. There stands the legate of the skies!—his theme divine, his office sucred, his credentials clear. By him the violated law speaks out its thunders; and by him, in strains as sweet as angels use, the gospel whispers peace! He establishes the strong—restores the weak; reclaims the wanderer—binds the broken heart-and, armed himself, in panoply complete of heavenly temper, furnishes with arms, bright as his own, and trains by every rule of holy discipline, to glorious war, the sacramental host of God's elect!—Coreper.

VALUE OF NEWSPAPERS .- There is no book so cheap as a newspaper; none so interesting, be-cause it consists of a variety, measured out in suitable proportions as to time and quality. Being new every week, it invites to a habit of reading, and affords an easy and agreeable mode of acquir-ing knowledge so essential to the welfare of the individual and the community. It causes many hours to pass away pleasantly and profitably, which would otherwise have been spent in idleness and

The poor negro women who found Mungo Park perishing under the palm trees of Africa, and who led him to their hut and supplied him with food and lulled him to sleep with their simple songs, were really polite. They addressed him in language of kindness and sympathy. They led him

fest those little attentions which gratify the heart, is a polite man, though he may wear a homespun coat and make a very ungraceful bow; and many a fashionable who dresses genteelly, and enters the most crowded apartments with assurance and ease, is a perfect compound of rudeness and incivility. True politeness is a virtue of the under-standing and of the heart; it is not like the white sepulchre or Sodom's far-famed fruit.

KINDNESS .- There is that in the law of kind ness which ennobles the human mind, and elevates all who practice upon its holy precepts to great eminence in the scale of being. Kindness has healed many a lacerated heart, and dried the tearful eye. It has often softened the temper of the morose and petulant, and caused even those who have been sunk in dissipation and vice, to look with loathing and distress upon their for lorn and lost condition. The sinner against the moral laws of the most High, may be led back to the paths of virtue by remonstrating with him on the depravity of his life in the language and spirit of kindness and love. . Denunciation—bitter and vindictive denunciation, never will save him, but a tender appeal to his better judgment will prevail with him. Hatred begets latred, and on the same principle kindness produces its like. What but the use of this disposition in man towards his fallen brother has produced the mighty reformation bro't about by the Washingtonian Reformists? Kind-ness, benevolence and love is the foundation on which have been reared the future happiness and prosperity of those who have been snatched from pit of misery and degradation into which they had fallen by an indulgence in the dreadful vice of intemperance. Let us all then be "kindly affect tioned one towards another, tender-hearted for-giving one another, and we shall never have cause to reproach ourselves for having done that which our consciences, in after life, will condemn. [Newark Temp. Advocate.

He who knows not what it is to enjoy. Recreation is only valuable as it unbends us. The idler knows nothing of it. It is exertion that renders rest delightful, and sleep sweet and undisturbed. He immediately threw off his cargo of meat to lighten his horse, and then urged onwards the animal to his utmost speed, in hopes to outsirip his pursuers, but discovered that the enemy were gaining rapidly upon him, and would scon have him at their mercy. He then adopted an expedient as singularly ingenious as it was desperately bold. Drawing his long scalping-knife, he plunged it into his horse's neck, and ut once severed the spine. The animal dropped instantly dead, and the determined hunter, throwing himself behind the fallen carcase, prepared to meet stantly dead, and the determined hunter, throwing himself behind the fallen carcase, prepared to meet his pursuers. In a moment one of the Indians came within range of his rifle, and was shot through the heart. The other two, seeing the late of their companion, halted for a moment, and then prepared to surround the enemy; but, as the first man had sent his ball whistling by the car of Richardson, he himself dropped from his horse from a ball from one of Richardson's long pistols. The third, seeing this rather a dangerous game to play, whipped his horse and was soon out of sight. Richardson had then only to gather the fruits of his victory. Fifteen years ago—says the Cleveland Plain Deal-er—a man committed perjury, in Sheldon, Gen-nessee county, N. Y., by which he not only, by the aid of strong circumstantial evidence, delraud-ed his neighbor of four or five hundred dollars, but also throw the graphsion of crime ways. but also threw the suspicion of crime upon the head of that neighbor:

bedside. The man uttered a confession of the crime, and as a seeble token of repentance, requested the whole to be noted down, and sent back

to the defrauded and despoiled individual.

The Plain Dealer adds:—"The confession was sent, but so incredible did the story appear, and so fixed were the impressions of the citizens of the guilt of their neighbor, and of the real perjurer, that naught but the highest written evidence could remove them. Certificates of the verity of the confession were yesterday sent, and after a larse of fifteen years, the stain upon the fair fame of the individual has been somewhat removed?"

A COLORED GENTLEMAN OF THE OLD SCHOOL. The editor of the Barre Gazette, writing from Richmond, Virginia, gives the following account of a faithful and very gentlemanly old servant of the late Chief Justice Marshall:

"The U. S. Circuit Court is now in session

here, held by Chief Justice Taney. I was present at the opening of the court on Monday, and observed an aged negro dressed in a lon-black coat, small clothes and stockings, knee buckles and other characteristics of fashion "sixty years old." As the Chief Justice entered the door, the old fellow rose and was greeted by the judiciary with as much civility as it he had been the "chief executive magistrate." The Chief Justice and the District Judge shook him cordially by the hand and made many inquiries for his health.—
On inquiry I found that he was the slave and favorite body servant of the late Chief Justice Marshall, whose memory the faithful negro cherishes in most affectionate remembrance.—He is but a nominal slave, now, preferring like many others here, not to be free. He dresses in precisely the style of his former distinguished owner, and insists on being at the door of the court room, as in days of yore, to tender his services to the esteemed suc-cessor of his old master. He takes the basef the Chief Justice, fills his glass of water, and does several other offices as proudly as if he were the titled chamberlain of a king, and is treated with as much consideration by the very urbane and popular jurist as his old master could have been." REMARKABLE.—One day last week, a lady of our acquaintance in this city, feeling sick at the stomach, took a teaspoonful of N. England rum, as she supposed; but not liking the taste, she examined the bottle, and found that she had taken corrosive sub-limate, which had been kept for the destruction of chintzes, whenever chintzes should come. The family becoming alarmed, the lady of the house proceeded to mix, as she supposed, a teaspoonful of ground ipecacuanha, and this the patient swallowed in her fright, as speedily as she had swallowed the poison. Judge, however, of the surprise of all, when they ascertained that the article was Scotch small. The accidents however off-sac equal to that endured by the ancient city of Troy, came forth from her couch entirely well; and, as she expressed it, "very much better for the Scotch emetic." As this is a new remedy for poison, we insert the fact for the benefit of the medical faculty at home and abroad.—U. S. Journal.

DEATH OF GEN. JACKSON.

The event which has so long been expecte with such painful anxiety, has at last occurred .-General Jackson is no more. He died in the even ing of Sunday the 8th instant. As the glorious sun was shedding his parting rays upon the Hermitage, the aged Here and Patriot sunk into the silence and darkness of the grave. He died, as he had lived, a Hero! It was not only the dauntless courage of the warrior that enabled him fear lessly to meet the great enemy, but there was superadded the calm philosophy of religion, which drew the sting and soothed the pang of the parting hour.

General Jackson's whole life has been devote to his country. His was a patriotism which ever burned with the brightest and greatest intensity and which nothing but death itself could quench He has impressed the energies of his great mind upon his age and country, and by his lofty patriotism and heroic spirit, has contributed to give to that country a still higher and nobler station among the nations of the earth. It will hence forth be known as the country of Jackson, as we as of Washington. Though his personal attach ments were strong above most other men, yet his love of country was still stronger-and he illus trated his own feelings and the true demands of patriotism, when in a recent crisis he solved a mo ment of doubt by the memorable expression " Leave your friend and stand by your country! The judgment of one of America's wisest and greatest men will now become the judgment o the present and future times, that "HE HAS FILL ED THE MEASURE OF HIS COUNTRY'S GLORY."-JEFFERSON has pronounced it-let it forever stand as his eulogium and epitaph .- Washington Con.

The following letter was addressed by Gen HOUSTON to President POLK, giving the first intel ligence of the death of the distinguished Hero of the Hermitage:

HERMITAGE, June 8, 1845-12 o'clock, M. My Dear Sir:—In deep sorrow I address yo this hasty flote. At six o'clock this evening, Ger Jackson departed this life. He retained his facul ties to the last hour. I lament that I was denie the satisfaction of seeing him in his last moment I was unfortunately detained in ascending the Mississippi, so that I did not reach Nashville until half past six o'clock this evening.

I immediately procured a conveyance, and came

out with my family, having understood that the General's health was exceedingly precarious, and being anxious to administer, if I could, some comfort, in the closing scene of his eventful life. On my way, a few miles from the city, I met the family physician, who informed me that the General

About three hours before his departure, he con versed for some time with his family and took an affectionate leave of them, as also of his domesaffectionate leave of them, as also of his domes-tics. His physician represents the scene as most affecting and remarkably touching; that he de-parted with perfect serenity of mind, and with a full faith in the promises of salvation through a

I have seen the corpse since my arrival. The visage is much as it was in life.

The funeral will take place on Tuesday next

at 11 o'clock, A. M. A nation will feel this loss, as a nation has received the fruits of his toils dur-ing the best years of his life. Very truly, your friend,

JAS. K. POLK.

Immediately upon the reception of the news i Washington, the President issued an official order, directing that buiness be suspended, and the pub lic offices and executive mansion be put in mourn-

The following general order, issued to the Army and Navy by Mr. Secretary Bancroft, is very justly pronounced by the "Union" as among the fin est compositions in the English language. It contains a just and eloquent eulogium upon one the first men of his country and his age.

GENERAL ORDER. WASHINGTON, June 16, 1845. The President of the United States, with heart felt sorrow, announces to the army, the navy, an the marine corps, the death of Andrew Jackson. On the evening of Sunday the eighth day of June, about six o'clock, he resigned his spirit to his heavenly Father. The nation, while it learns with grief the death of its most illustrious citizen, finds solace in contemplating his venerable character and services. The valley of the Mississippi be-held in him the brayest, and wisest, and most fornea in nim the bravest, and wisest, and most for-tunate of its defenders. The country raised him to the highest trusts in military and in civil life, with a confidence that never abated, and an affec-tion that followed him in undiminished vigor to retirement, watched over his latest hours, and pays its tribute at his grave. Wherever his lot was cast he appeared among those around him was cast, he appeared among those around him, first in natural endowments, and resources, not first in natural endowments, and resources, not less than first in authority and station. The power of his mind impressed itself on the policy of his country, and still lives, and will live forever, in the memory of its people. Child of a forest region, and a settler of the wilderness, his was a genius which, as it came to the guidance of affairs, instinctively attached itself to general principles, and, inspired by the truth which his own heart revealed to him in singleness and simplicity, he vealed to him in singleness and simplicity, he found always a response in the breast of his countrymen. Crowned with glory in war, in his whole career, as a statesman, he showed himself the friend and lover of peace. With an American heast whose these heart, whose throbs were all for republican free-dom and his native land, he yet longed to promote the widest intercourse, and the most intimate com merce, between the many nations of mankind.— He was the servant of humanity. Of a vehement will, he was the servant of humanity. Of a vehement will, he was patient in council, deliberating long, hearing all things; yet in the moment of action, deciding with rapidity. Of a noble nature, and incapable of disguise, his thoughts lay open to all around him, and won their confidence by his ingenuous frankness. His judgment was of that solidity, that he ever tempered vigor with prudence. The flushings of anger could never cloud his faculties, but rather kindled and lighted them up, quickening their energy without disturbing up, quickening their energy without disturbin their balance. In war, his eye at a glance dis their balance. In war, his eye at a glance discerned his plans with unurring sagacity; in peace, he proposed measures with instructive wisdom, of which the inspirations were prophecy. In discipline stern, in a just resolution inflexible, he was full of the gentlest affections, ever ready to solace the distressed, and to relieve the needy; faithful to his friends, fervid for his country. Indifferent to other rewards, he aspired throughout life to an honorable fame, and so loved his fellow-men, that he longed to dwell in their affectionate remembrance. Heaven gave him length of days, and he filled them with deeds of greatness. He was al-

ways happy; happy in his youth, which shared the achievement of our national independence; happy in his after years, which beheld the valley of the West cover itself with the glory of free and ever increasing States; happy in his age, which saw the people multiplied from two to twenty millions, and freedom and union make their pathway from the Atlantic to the Pacific; thrice happy in death, for while he believed the liberties of his country imperishable, and was cheered by visions of its constant advancement, he departed from this life in full hope of a blessed immortality, through the merits and atenement of his Redeemer.

Officers of the army, the navy, and the marine orps, will wear crape on the left arm and on their words; and the colors of the several regiments awords; and the colors of the several regiments will be put in mouning, for the period of six months. At the naval stations, and on public vessels in commission, the flags will be worn at half-mast for one week; and on the day after this order is for one week; and on the day after this order is received, twenty-one minute guns will be fired, beginning at 12 o'clock. At each military station, the day after the reception of this order, the national flag will be displayed at half-staff from sunrise to sunset; thirteen guns will be fired at day-break; half-hour guns during the day; and at the close of the day a general salute. The troops will be paraded at 10 o'clock, and this order read to them, on which the labors of the day will o them, on which the labors of the day wil

Let the virtues of the illustrious dead retain their influence, and when energy and courage are called to trial, emulate his example.

GEORGE BANCROFT,

Acting Secretary of War, and

Secretary of the Navy.

Burial of General Jackson. The Nashville Union of the 12th instant, gives he following account of the funeral ceremoni and burial:

Early on Tuesday morning every vehicle in the city that could be procured was put in requisition, and a vast concourse of the citizens repaired to and a vast concourse of the citizens repaired to the Hermitage. There was an immense assemblage present from all the surrounding towns and counties. The body of the old Hero was laid out in the parlor with the face uncovered—every one being anxious to take a last lingering look at him. We saw present many of his old companions in arms, and many a tear fell from their manly cheeks as they gazed for the last time upon his teatures cold in death.

At 11 o'clock, the Rev. Dr. Edgar preached a most impressive and elequent sermon—his text

most impressive and eloquent sermon—his text was taken from Revelations, 7 chap., 13th and

4th verses. The eloquent divine gave an interesting sketch of the conversion of General Jackson about six or seven years ago, and bore the strongest sestimony in behalf his christian life and walk.— His delineation of his character as a soldier ommander, statesman and patriot, was striking and eloquent.

After the religious services were ended, the

After the religious services were ended, the body was conveyed to the vault prepared many years since for its reception.

In the presence of the vast assembly, without pomp or display, his body was deposited by the side of that of his beloved wife, which has been there resting for fourteen years. It was his wish that he should be buried quietly and peacefully, without pomp or display, and so it was done.—Capt. Carrell's fine company of Blues was present in uniform, which gave additional interest to the occasion. The solemn ceremony was closed by the discharge of three volleys over the grave, under the command of Gen. Harding.

Thus died and thus was buried Gen. Andrew Jackson. We deem it unnecessary to speak of

Jackson. We deem it unnecessary to speak of the character of one so illustrious that his name and fame have filled the world. He had emphatically filled the measure of his country's glory, and at a ripe old age he quietly and calmly breathed his last, having made his peace with his God and laid up for himself an imperishable treaure in Heaven.

Tuscany Wheat.

The editor of the Martinsburg Gazette has the ollowing as to a new species of Wheat in that ection:

"We paid a visit yesterday to the 'Harvest field' of Mr. Jacob Hamme, at the edge of town, and there saw a specimen of the finest Wheat we have ever seen grown in this section of country ti is a white bearded Wheat—called the "Tus-cany Wheat"—the grain is very large. There was some Mediterranean Wheat growing in the same field, but it was not to be compared in any ect to the Tuscany, and will not yield a hing like the same amount to the acre. Fortive heads of the Tuscany were taken indiscriming tely from the field and weighed, in the chaff, half pound. Mr. Hamme intends to dispose of his crop this year for seed, and we hope our farmers will give it a trial. The heads will average from 45 to 50 grains each."

LAST PORTRAIT OF GENEBAL JACKSON .-- A COT respondent of the Nashville Whig says, that Healy's cortrait of General Jackson, recently painted for Louis Philippe, is decidedly the best that has ever een taken of the old hero. It represents him, in-eed, as on the verge of existence, the complexion loodless—the eye calm—without fire—without passion—but not altogether without "speculation" he form and figure bent and emaciated—the coun enance placid, though much shrunk from the for er proportions, which gives to the face a more congated appearance, and the forehead a little nore of relative elevation than appears in the paint-ngs hitherto made of him. The abundance of his mow-white hair is most naturally represented without any precision of adjustment.

Louis McLane, of Maryland, has been appo ed by the President, Minister Plenipotentiary an Envoy Extraordinary to the United Kingdom of Breat Britain and Ireland, vice Edward Everett

This appointment, it is believed, will give satis action to all parties. The "Union" referring t he subject, says-"We congratulate the countr on the appointment of Louis McLane as Envo Extraordinary and Minister Plenipotentiary t ondon. He has been invited to the public ser ice without the slightest solicitation on his part. He has been for several years in retirement, if the successful management of the Baltimore and Ohio Railroad company, as president of that institution can be considered as a retirement. First, as i ember of the House of Representatives, then, as ninister to England, Secretary of the Treasury and Secretary of State, and as a minister to Lon on, he has earned a name as a statesman and a pa riot, of which his country may be justly proud He seems eminently calculated to meet the pre ent crisis between the two countries. This able and experienced gentleman accepts the office of ninister at the most distinguished court in th vorld, at one of the most eventful crises which ould occur in the relations between the tw ountries, and when the most important interest of his own nation are involved in the issue. He arries with him to the court of St. James grea alents, extended experience, particularly at that court, where he formerly represented the interest of the United States with great distinction. Pru ent, firm, and sagacious, he will assert and main ain the rights of his own country, without viola ing the respect which is due to the British governnent. He is orthodox on the great question which now divide the country; and in none more so than on the important questions of Texas and Oregon.

We understand that Mr. McLane will probably leave the United States as early as by the steamer of the 15th July

"Proscription." The editor of the Fredericksburg Recorder fur ishes the following as to removals from office. He says :- " The position of the President in rela ion to the appointment of officers, is one of pecu ar difficulty. On one side he is perpetually anloyed by the importunities of the office-seeker and on the other, by equally importunate suppli eations of the office-holder. Many removals mu of course, be made; some from obvious propriety and others, we doubt not, from the helter-skelte nanner of their appointment in 1841, upon the implest principles of public duty. Some change ave been made; and the Whig presses have rais ed the clamor of 'proscription.' But as yet, w believe the charge to be entirely unjust. The Custom Officers, and Foreign Agents certainly should represent the views of the Administration and it is in these chiefly, that changes have been made. Where they have occurred in other de partments of the public service, we believe the de perit of the officer, more than his political opinion as been the cause of his removal. We infer this from the fact, that Democrats suffer some, as wel as Whigs; and from the still stronger fact, tha nearly all the appointments are conceded to be ex-tremely judicious. Mr. Polk oridontly intends to commence and carry out a reform. In doing this, ne will 'take his time,' and neither pander to the proscriptive spirit of some of the Democratic pary, nor regard the wailings and denunciations o

Texas. The Union of Tuesday has the following as t exas. It savs :- "We had the opportunity of onversing yesterday with a most respectable and ntelligent citizen, lately from Texas. He has no doubt of annexation. It is all safe. Congress. which met yesterday at Washington, would no oubt accept the propositions of the United States nd the Convention, which is to assemble at Aus in on the 4th of July, will ratify them agreeably o the wish of the people of Texas. He confientd y expresses the opinion that President Jones has never sent a special agent to Mexico, neither with "man in a white hat," nor a man in a black hat o negotiate for the independence of Texas; and hat the farthest point to which Jones could have one, was to inform Capt. Elliot, that if he would tipulate for the independence of Texas, he (Jones) would submit the proposition to the people, Nous

errons!" Removal of Lt. Hurst.

The Martinsburg Republican furnishes the fol owing, in reference to the superlatively ridiculous out-cry of the Whig prints against the remova f Lt. Hurst. These fault-finding journals, how ever, have hard work to "follow their vocation," and it must naturally be expected that they wil ry to make mountains out of molehills.

"In WANT OF CAPITAL.—Some of the Whig papers are finding fault with Mr. Polk because he has 'discharged,' as they say, a licutenant from the Navy for being engaged in a duel; and charge him of inconsistency in bestowing civil appointments upon men who have been guilty of the same offence. It is true a licutenant has lost his comnission, but why do not the whig presses inform heir readers that it was forfeited by a violation of he regulations; and that he was tried by a cour martial, the sentence of which Mr. Polk could not refuse to endorse without a disregard of that discipline and subordination admitted to be necessary in the Navy. When the difference between Naval and civil appointments is considered, the charge of inconsistency is perfectly groundless.—
t is contended, too, for consistency, that H. A.
Wise should not be retained in office because he Wise should not be retained in office because he and Mr. Polk once had a personal difficulty, and because Mr. Wise was second to Graves in a duel. If Mr. Wise fills the office he holds with credit, we think it does credit to Mr. Polk to retain him, uninfluenced by personal feeling if any exists.—This is the light in which the people will view these matters."

Preparation.

The Washington Constitution closes an article on our relations with Great Britain with this lan-

"In a lew weeks the entire appropriation for the service for the year 1845-6 will be available and these are ample to enable the Executive to adopt any precautionary measures which in his wisdom he may deem necessary or prudent. Let every serviceable gun in our fortifications be mounted—let every available ship be placed in commission—if the dreadful alternative of war shall be forced upon us, our extensive merchant marine will furnish an abundance of gallant tars to man them for sufficient service. The judicious expenditure of a few thousand dollars in preparation for hostilities, may save millions by averting them. In the present juncture of affairs, it may be emphatically asserted that preparation for war will be the most efficient preservative of peace.

We believe, however, by a very ttle exertion on the part of our friends in Je on, and the counties of this Congressional Dis rict, the circulation of the paper may be greatly extended, and we shall thereby be enabled to ren ler it more worthy the support of its friends and he public

It is unnecessary, to give promises as to the future ut suffice it to say, that if we are sufficiently enouraged in our enterprise, we are determined t resent a journal every way worthy of public pproval.

The new Post Office Law goes into operation n the first of July. This will give to all who eside within thirty miles of the place of publicaon, an opportunity of receiving their papers free f postage. We hope our friends in neighbor g counties will avail themselves of the op-ortunity afforded, and give us a helping hand when it can be done at a very trifling expenditure n their part.

By a very little exertion, every subscriber or ur list could add another. Make the trial, friends, and see if we are not correct.

"The Academy was nearly destroyed, and we fear that many admirable paintings and other works of art were greatly damaged; if not utterly ruined. Among the noble works in the building, were three by Benjamin West—Death on the Pale Horse—Christ Rejected, and another, the subject of which we do not remember—several by Washington Allston, and one or two by Leslie. There were also many gems by the old masters, he collection being one of the most valuable in the Union. Many were carried out in time, and the Union. Many were carried out in time, and were thus saved—while others will be recovered, but greatly damaged. The Statuary suffered materially, as in the confusion, many of the choicest specimens were broken. The loss is a most deplorable one, and will give pain to every true friend of the arts. he avaricious and unfounded pretensions of Great Britain, or recede one lota from the true boundar f our just claims, except it be to conform to our compromise proposition to concede all north of the 49th degree of north latitude. Even in this we hink that our government would be making too great a concession. We do not mean by this to refer alone to the amount of territory given up; ut we are decidedly of the opinion that the line hould be located far enough north to secure us he command of the mouth and navigation of Fraper's river, also the Gulf of Georgia, which would nclude Vancouver's Island. This line would lace under our control almost entirely the Columbia river, with all of its important tributaries. f we were to designate a line in accordance with

ur views here given, we would fix upon the 52d

egree of north latitude. The 49th degree of lati ude runs a little south of the mouth of Frazer's riv . And this line, running due west to the Pacific would give to England nearly the whole of Vancou erla's land, with of course, we presume, the right to command jointly with tis, the waters of Claset's Strait. But the line laid down on the map before us seems to be one which nature would designate From the direction given to the streams north an south of that line, it is evident that there is a ridge of high land or mountains extending from the gree chain of Rocky mountains to the waters of th

Pacific. On the south of which the rivers al flow in a southernly course, while those on the orth tend northward. We have another reason why we believe but little importance is to be at ached to the rumor referred to. England has to trong a regard for her own interest to attempt to ring about an open rupture with us at this time If indeed she could thwart the project of annexation by a war, the temptation for her to resort to arm would, we can readily conceive, be great. And if was should be brought about, this will be the real cause while the Oregon question would be used to cover up, if possible, the grossly iniquitous and covetous motives by which she would be actuated Yet this would conceal but poorly the black and plaring injustice of her designs. But if war mus ome, we, for one, say let it come, ere we brook longer British impudence, and British interference with our affairs on this continent.

Water! Water!

Our attention has been called to the subject of he unequal distribution of the privileges and benefits of water in our Corporation. While som parts of our town are well supplied with wells, there s one part which seems to be almost entirely ne lected. We allude to the part in which our public buildings are located;—being, indeed, in the immediate neighborhood where water is most needed, as well as on account of injuries that ght occur from fire, as for other purposes. s true that one or two efforts have been made to btain water by sinking wells within the locatio eferred to, but from some cause or other they have proved ineffectual. We feel constrained to call the attention of the town authorities, and the citizens of our town to this important subject .-And beg leave, most respectfully, to say, that a rue regard to convenience and safety would suggest the great propriety of having a well at or about he south-east corner of the Market-house, wher we have no doubt but that water may be had at a easonable depth. It is always an evidence of sound policy to provide in advance, as far as practicable, the ways and means to prevent the loss and damage that grow out of accidents or mischievous deeds,-and particularly, when in doing so, we add to our comfort and convenience.

In Baltimore, New York, Philadelphia, &c. we notice that arrangements are being made to pay appropriate honors, on the occasion of the death of Gen. Jackson. Party prejudices must be now cast to the winds, for a nation mourns the loss of her proudest son.

THE CONTRAST .- The United States make The Contrast.—The United States make conquests by the peaceful workings of the genius of their Republican institutions—England by the power of her sword! By this unjust and tyrannical mode, England has extended her dominions into every quarter of the habitable Globe, till the sun never sets upon her bloodstained flag, and her enslaved and degraded millions. There is nothing to be deprecated in all this: but that the United States should dare admit into her embrace, and permit to share in her destinies a bordering and permit to share in her destinies a bordering and permit to share in her estatices a contenting Republic, at the earnest solicitation of her people, is a most outrageous infraction of national law, and evinces a spirit of conquest unprecedented in this enlightened age of the world, and disreputable to the character of the nation!

STEAMBOAT COLLISION ON THE HUDSON .-STEAMBOAT COLLISION ON THE HUDSON.—
Loss of Life.—About one o'clock on Friday morning, the steamboat Empire, when opposite Barnegate, six miles below Poughkeepsie, ran into a sloop with such force as to nearly sever her apart.

The sloop immediately sunk, leaving scarcely time for the crew to escape. A colored person employed on the sloop, and in the cabin at the time of the accident was drowned. The officers of the E. were prompt in their efforts to save the lives and property of those on board the vessel—and she was taken in tow to Poughkeepsie. The sloop did not show any light.

AN AMERICAN WHIG PAPER AT WASHINGTON. —In the Washington correspondence of the Al-bany Atlas, it is asserted that Messrs J. Gideon nd son, of the former city, are to bring out in the course of the season a new whig journal, which is to take the whig side in local matters and doctrines, but the American side on all questions at issue bethe American side on all questions at issue obetween this and foreign governments. This will be a singular sight—a whig paper—a whig organ of the junior portion of the party pitching on the same key with the democratic instrument. This enterprise has been projected in consequence of the foreignized tone of the entire whig press in the Union—a tone which it is asserted does harmonize with the feeling of that portion of the whig party which is imbued with the federalism of former days.— The project is natural enough—the excuse for carrying it into execution ample, and we should really be pleased to see a whig paper, whose sup-posed position or natural affinity did not throw t into the ranks of the anti-American English Journals. We can get along very well with the local heresies of the whigs, but their public agreement with the most boisterous of our traducers, in England, is carrying the matter to a repulsive extremity which it will be the aim of the new paper to correct.—Cleveland Plaindealer.

NEW YORK. New York is like the famous tower of Babel i two respects—its noise, and the confusion of its languages. "A curious volume might be written descriptive of the various churches in this city, the religions taught in them, with the characteristics of the officiating preachers. You may find seets here of every Christian creed, who have regular meetings on the Sabbath, and sincerely believe that they are the favored ones, who have the truth, while all the rest of the world are groping in error. The peal of the organ in the fine Catholic Church in Canal street, disturbs the philosophical Infidel, who is haranguing his brethren on the origin of evil and the delusions of the Bible in the hiall hard by. Here meet the Mormons, or Latter Day Saints, and, a few doors further on, you may listen to an eloquent Unitarian, who has one of the most intellectual audiences in the city. In that dingy little building in Broome street; a plain-looking man is preaching a discourse in the Welsh language; and come with me to this old hulk of a ship converted into a Bethel chapel, and moored to one of the pires in the North River, and you may hear the Rev Mr. Hedstorm, a countryman of Frederica Bremer, preach in Swedish to some of his sea-faring brethren. The French danguage may be heard in three of our largest churches, two of which are costly and magnificent structures. There are two Swedenborgian societies, which are said to be increasing in numbers; and the Lutherans begin to be an important sect. An elegant Moravian chapel has recently been erected in Houston street. The Unitarians are putting up a handsome Church in Broadway near Prince street. Mr. Wise at Court.

Mr. Wise at Court.

We have received a letter from Rio, which gives the following sketch of the etiquette of the Court of Brazil.—Brooklyn Star.

Mr. Wise has been presented to the Imperial Court of Brazil, and is now duly installed as Minister Plenipotentiary of the United States. One of the party gave us a faw days since a description of his reception by the Emperor and his Court. He was accompanied by Mr. Walsh, the Secretary of legation, and one of our naval officers, all dressed in full uniform—swords, cocked hats, &c. They were driven to the palace in a splendid barouche of four; on arriving at the palace, they were bowed into an ante-room—soon after which were bowed into an ante-room—soon after which they were conducted to the door of the reception room, where the Emperor and some of his principal officers were in waiting to receive them. On entering the door they stooped and made a low bow, then walked forward to about the centre of the room, stopped, and made another low bow; they then proceeded to near the foot of the throne, where they stopped and made another low bow. Mr. Wise then made a speech to the Emperor, a copy of which had been previously given to the Emperor's prime minister, in order that his Majesty—being too much of a heathen to understand English—might be duly informed of what was about to be said to him by the government of the English—might be duly informed of what was about to be said to him by the government of the United States through its new representative.

At the close of the speech, Mr. Wise ascended the steps of the platform on which the the

the steeps of the platform on which the throne was erected, and presented to his Imperial Majesty his credentials, &c. The Emperor then said "statom," (very good,) and a few other words, expressing the great satisfaction, &c., which these friend ly assurances on the part of the United States had afforded him. Our Minister and his two attendants, after another low bow, at the foot of the throne, commenced their retreat. The room was from eighty to one hundred feet in length, and this distance was to be traversed backward, as it is wholly contrary to court etiquette to turn one's back to the Emperor. Fixing their eyes, therefore, upon the Emperor, and judging the line of direction by the lines of the carpet, they effected their retreat in a very good order, to the centre of their retreat in a very good order, to the centre of their retreat in a very good order, to the centre of their retreat and their retreat in a very good order, to the centre of their retreat in a very good order, to the centre of their retreat in a very good order, to the centre of their retreat in a very good order, to the centre of their retreat in a very good order, to the centre of the cen the room; here they stopped and made another low bow to the throne. They then recommenced their retreat. Mr. Walsh, having often travelled that way before, was so fortunate as to hit the right door—But the Minister was less fortunate. Either there was a divergency in the line of the carpet, or distortion of the visual rays, which, like the rays of light on entering our atmosphere, became bent downward toward the centre of attraction. So, Mr. Wise, retreating upon a curvid, instead of a right line, came near making his exit at the wrong door, whether into the apartment of the maids of honor, or into the kitchen, this deponent saith not. After several beckonings from the secretary, by a skifful tack, he regained his proper position. After arriving at the door, all three again stopped and made another bow, then backed themselves out of the room.

INTERNAL IMPROVEMENTS IN RUSSIA.—The Emperor of Russia contemplates the construction of a system of Railroads to intersect all the principal cities of his vast empire. The consequent extensive consumption of Iron, will greatly increase the demand for that article. It is likely much American Cotton will be transported by this road—a considerable and annually increasing amount that heretofore been conveyed between the two great cities along the roads by horse power.

Are Our Mechanics Worthy of

Support? HOW often do we hear it remarked by the Gentlemen of our Village and its vicinity "that we would greatly prefer encouraging our own Tailors to those of the Cities, if they could only out as well—but really, I am afraid to trust them!" exported during the same period was valued at \$8,397,282. England and her dependencies received \$3,347,072; France and her dependencies \$1,219,044; Holland and her dependencies \$1,275,691; and Hanse Towns \$1,611,337. The And, acting under this apprehension, as they say, of having their cloth spoiled, give their patronage and money to the Tailors of our cities, while our own Tailors, although they may have equal worth and skill in the profession, are left almost without support, whilst the city Tailors are rolling in wealth. Ought this to be so? And in order to 182,468; and the total exports of all domestic articles during the same time amounted to \$99,715,-179. The exportations of Lard from the United States during the year ending on the 30th of June, 1844, amounted in quantity to 25,746,355 lbs—an increase, compared with 1842, of 5,633,958 lbs. The exportations of Cheese were 7,343,145 lbs. an increase over those of 1842 of 4,886,438 lbs. endeavor to correct it, and meet at once the wishes and desires of those gentlemen, I have, with some difficulty, succeeded in getting Mr. ARTHUR G. Divinest girl in Pumpkinville!
Your image haunts me every day,
While hoin' corn, or makin' hay,
Or grindin' at the cider mill.

And when I think of you dear girl,

My heart fricks like an April lamb,
And jumps about my diapram

QUACK, QUACK-Bow, Wow.-The Boston Olive Branch says-Last week we told the story of our minister to China, Mr. Cushing, at Man-darin Lin's, eating heartily of an unknown dish, which he tho't was duck, but which turned out to be puppies. This induces one of our exchanges to tell the following ancedote, which is rather rich: "Speaking of dogs, reminds us of a scene told of Lockport, by a late contributor to the Knickerbocker. A clown there walked up leisurely to the stall of one of those small traders who furnish canal-tourists of limited means, with "wittles and drink," and just as the vender was on the point of disposing of a large lot of sausages to a hungry looking traveller, which were to last him until his arrival at Buffalo, the vagabond, looking suspi-

Is them good sassengers ?"-"Is them good sassengers?"

"Yes, they are gond sausages, you ignoramus.
You would like to keeping from selling 'em, if you could fix it that way, I don't doubt."

"No, I would'nt," responded the loafer,—I don't know nothin' special about them sausengers; they may be good sassengers. I don't say they an't good sassengers; all I do say is, that where someour you see them kind o sussengers.

somever you see them kind o sassengers, you don't see no dogs."

"I guess on reflection," said the traveller, "that I won't negotiate for them articles .- That man's last remark has g'in me a dislike to 'em."

"BEAR" ON TEMPERANCE .- The "Buckeye Blacksmith" is at Boston, and recently giving an account of his progress in temperance, he said: "There, the 'ship of Jollification' is anchored off in the bay, bound for the 'city of Destruction.' I got on board, but intended to go no further than point 'Just Enough,' but no such a point is to be found on the voyage, for the first glass is 'too much.' Not being able to find this point, I proceeded on until I came to 'Tipsy Island.' There I tound a jolly set of tellows, but I was not contented to remain there and so leave to beard intil tented to remain there, and so kept on board until I arrived at 'Toper's Zenith;' thence proceeded to I arrived at 'Toper's Zenth;' thence, proceeded to 'Hiccup Island;' thence to 'Blackeye Lane;' thence to 'Bloody-nose Street;' thence to 'Peel-skin Alley;' thence to 'Sleepy Hollow;' and thence to a place called 'Poverty's Valley,' which is situated this side of the 'city of Destruction.' There I jumped overboard and took a cold water spree on 'Cool-off Beach,' the last stopping place this side of the city to which the vessel was bound."

Bunyan will hardly be mentioned after this.

THE DEACON FOR ME .- " Papa," said one of his boys to the deacon, " I had a very funny dream

"Well, Tommy, what was your dream?" "I dreampt the devil came into your store."
"The devil!"

"Yes, Pa, the devil; that he found you drawing a glass of gin for poor Ambres Jones, who had fits, and broke the little baby's arm the other day, because she cried when he came home drunk. And ught the devil came up to the counter, and laid the end of his tail on the chair, and leaned over towards the barrel where you were stooping to draw it, and asked you if you was a deacon.—
And I thought you didn't look up, but said you was, and he griuned and shook his tail like a cat with a rat, and says he to me, 'that's the deacon for me,' and run out of the shop laughing so loud that I put my fingers in my ears and woke up."

Mister, how do you sell your sugar to-day? Only twenty-five cents per pound. Can't give it; I'll drink my coffee without sugar, and kiss my wife for sweetning first. Good

Good day sir. When you get tired of that kind of sweetning call again. Perhaps I may. He called next day.

Modesty .- There is a young lady in Ohio, so modest, that she calls stockings, the "covering of a person's foundation."

A poor wife "dears" and" my loves" her husband, and wouldn't sew a button on his coat to keep him from freezing. A sensible wife looks for her enjoyments at home

-a silly one abroad. A wise girl would win a lover by practising those virtues which secure admiration when per-sonal charms have failed.

THE MOST COMMON SAYING ls that I would not give one bottle of Dr. SWAYNE'S Compound Syrup of Wild Cherry, for half a dozen of any other preparation. I have tried all the popular ones, but this stands unri-ded for the cure of the following diseases, viz: Influenza, Coughs, Colds, Consumption,
Spitting of Blood, Palpitation of the Heart,
Whouping Cough, Tickling and Rising
sensation in the throat, Bronchitis, Asthma, or weakness of the Neryous System or impaired Cons-

titution arising from any cause, and to prevent persons from fulling into a Decline, this medicine has not its And when too much calomel or quinine has been used, this medicine will prevent its evil effect on the system, and repair the billary functions.—
As a proof of the above medicine giving great As a proof of the above medicine giving great strength and clearness to the voice, a gentleman from one our large auctioneering establisements in Philadelphia, who has been using this Syrup, says that it is the greatest medicine to cry on he ever saw. Of course, the minister or lawyer, who have to exert their voices, would be equally benefitted. Reference will be given to the auctioneer, by calling at my office.
