Yes, my juvenile hearers, in the example of
the illustrious Franklin, the once poor, illiterate
tallow chandler boy, you have a lesson replete
with instruction. For it shows you most clearly that a good education, with all its usual concomi tants, wealth, fame, and renown, can be procured

by the indigent though they never pass the threshhold of a college.

And, my juvenile hearers, where did the once poor illiterate, plough boy, David Rittenhouse of Pennsylvania, graduate? Was it at either of these ancient and reputable seats of literature, Harvard University, Yaie, or William and Mary? Certainly not. He neither graduated at one of these nor at any other college; and yet, by his ustiring industry, in the pursuit of literature, he not only made himself well acquainted with the English, Freuch, German, and Dutch languages, but also became one of the greatest astronomers that the world ever saw—yes, young gentlemen. but also became one of the greatest astronomers that the world ever saw—yes, young gentlemen, he was, apparently, as well acquainted with the orbitral movements of those multitudinous glittering worlds, which are now suspended in the ing worlds, which are now suspended in the few days ago, near Springfield, Illiuois. Some of ethercal vault, as you are with the public high-his ribs were broken, and he was otherwise inways leading from Smithfield to Watson's and jured, but we hope not fatally.

But they will, in all probability, secure for you something infinitely more valuable than either you something infinitely more valuable than either the gold of Opher, the gems of Golconda, or the adulations of millions of your fellow-men. They will enable you to read, understandingly, the scriptures of eternal truth, which will doubtless make youall good christians whilst occupying theselower regions where sorrows grow. CONFESSION OF THE WHIGS. From the New York Mirror, (Taylor.)

WHIGS OF NEW YORK !-- If you don't want is in favor of the Wilmot Proviso, Gen. Cass is has been trying, for a week to find a finance committee who will raise \$20 to pay for the documents, but without success! Are the Whigs disinprejudiced mind that Mr. Fillmore is an abolily and Joe White have left the party? What are as well have an "Old Weman's Committee" for all that we can discern in the way of active ener-

gy in the cause." The N. Y. Courier and Enquirer thus mourns over the prospect of the Universal Kingdom of Koondom, and calls "spirits from the vasty deep ?" " A PLAIN TALK FOR LIVE WHIGS .- We have a few words of counsel for the Whigs in regard to the great contest so near at hand They may not be welcome; they may be deemed impolitic, but we believe them to be true, and they ought therefore to be heared and heeded. Nothing is ever gained by shutting our eyes to facts. It may be more agreeable to sleep, in the belief that all

but it is not safe, and he is a false and treacherous sentinel who will not or dare not sound the "We believe that, in the existing state of the public mind-without efforts on the part of the Whigs not yet put forth, Lewis Cass is almost ertain to be elected President in November next. We are compelled to this belief, most refuctantly. by what we see and know of the state of public terling and the lack of proper effort. Doubt it, deny it, wish it otherwise as we may, the Whig par y, especially in the North, is anathetic, indifferent; inactive-compared with what it should be, and with what it must be, if it expects to win again repeated. The Government la the victory. * * The Whigs have no adequate or proper notion of the exertions made by our ope ponents. They are thoroughly and completely organized, and are putting forth the most desperate efforts in every section of the Union where

they have the slightest prospect of success. * It is believed by many, and urged as an excuse for inaction, that the movements of the Barnburners will insure the defeat of Cass. This it is by no means certain. In this State, it will undoubtedly help the Whigs. But out of this State, e we fear it will hurt them more than it will heip them. It has already caused the defeat of a part of the Whig ticket in Indiana, and there is danger that it may have the same result in Ohio and New England.

And his name stands first and foremost appended to the constitution under which we live. President Harrison was bred a soldier, and rendered his country important military services. But General Harrison, nevertheless, was for a much greater part of his life in civil than in military service. He was for twenty years either the Governor of a Cerritory; a Member of Congress, or a Minister abroad. And he performed his duties in all these

all acrimonious humors and incrustations. DISEASES OF THE LUNGS-CONSUMPTION. This is a very prevalent and fatal disease; results mostly from neglected coughs, colds, and bronchitis, also from improper treatment in many other cases, such as measels, fevers, inflamations and small pox; and a host of other badly treated diseases; where the cause, instead of having been thoroughly removed from the blood and body, have only been palliated or removed from one part to break out in another. By divesting your bodies from all foul humors, through the medium of Dr SWEETZER'S PANACEA, the cure is at once ren dered certain and permanent. Recollect while there is acrimonious humors floating in the circulation, it is as apt to settle on the lungs as any other part of the body; this is the reason that con sumption is so prevalent.

BILES, SORES AND ULCERS, Which you see on the exterior, come from, and have their source in, the interior, and might just as well have settled on your lungs, liver, or any other part; which we know they frequently do, and produce most violent inflamatory disorders. The humor which occasions these sores is of a highly acrimonious burning nature. We know it from the pain it gives in forming, and afterwards from its rapidly ulcerating and corroding the flesh and skin of the part where it breaks out. This shows the necessity of frequently purifying the blood with Dr. SWEETZER'S PANACEA, and keeping such malignant humors in subjection. Should you have a bile or ulder, be thankful that nature has taken the trouble to warn you of the danger your life and body is in, for it is a warning that the blood is foul. Had this same acrimony selected the lungs instead of the surface of your body for its seat, consumption of the lungs would have been the consequence.
