Poetry.

THE ABIDING AND THE FLEETING.

FROM GOETHE.

Early joys, how false and fleeting! Vanishing within the hour.; Envious, murky west-winds beating, Come and wither every flower.

Which the autumn storms must sadden, And whose fairest leaves must fade?

Quickly snatch the moment's share!

Think I thy vale, of joy the giver, Changes with each shower of rain;

Can I in the verdure gladden, Casting now its grateful shade,

Seekest thou life's fruits to win?

These to ripen will begin, Let the others blossom there.

In the same transparent river

Thou wilt never bathe again.

Thou thyself art ever changing!

Palaces and walls high ranging,

And the foot that boldly, madly

Forms that now before thee rise,

Thou behold'st with other eyes. Vanished are the lips that gladly

Once bestowed love's fond embrace

Trod the hunter's mountain-chase

And the hand that for thy brother

Nobly worked in weal and wo. Everything is now another; Swift they come and noiseless go.

All the form that bears thy name,

And rejoins its native flood.

To beginning let completion Follow in harmonious rhyme;

Yet outstrip the flight of time.

Gifts for ave thou mayest inherit,

The reward within thy breast

Take Particular Notice. Dr. J. addresses all those who have injured themselves by private and improper indulgences, that secret and solitary habit, which ruin both body and mind, unfitting them for either business or society. These are some of the sad and melancholy effects pro-duced by early habits of youth, viz: Weakness of the Back and limbs, Pains in the Head, Dimness of Sight, Loss of Muscular Power, Palpitation of the Heart, Dis-pepsia, Nervous Irritability, Derangement of the Diges-tive Functions, General Debility, Symptoms of Con-sumption, &c.

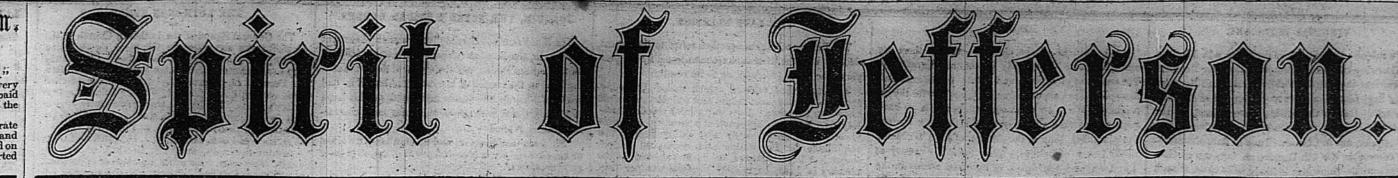

sumption, &c. MENTALLY.-The fearful effects on the mind are much to be dreaded; loss of memory, confusion of ideas, depression of spirits, evil forebodings, aversion to society, self distrust, love of solitude, timidity, &c., and some of the evils produced.

#### Nervous Debility.

Weakness of the system, nervous debility and prema-ture decay, generally arising from the destructive habit of youth, that solitary practice so fatal to the healthful existence of man, and it is the young who are most apt to become its victims from an ignorance of the dangers to which they subject themselves. Parents and guar-dians are often misled with respect to the cause or source of disease in their sons and wards. Alas! how source of disease in their sons and wards. Alas! how often do they ascribe to other causes the wasting of the frame, Palpitation of the heart, dyspepsia, indigestion, derangement of the nervous system, cough, and symp-toms of consumption, also those serious mental effects, such as loss of memory, depression of spirits or peculiar fits of melancholy, when the truth is they have been in-dulging in pernicious but alluring practices, destruc-tive to both body and mind. ## A THRILLING SCENE. BY CHAS. RAND.

The following narrative-a true one-describes a scene that actually took place not many years since, in a country town in the State of Maine.

ta, Ga., thus sketches the marriage scene : One evening in the month of December, eighteen hundred and thirty-four, a number of I have drawn for you many pictures of death; townsmen had assembled at the store of Mr. let me sketch for you a brief, but bright scene of beautiful life. It is the marriage altar. A Thomas Putman, to talk over matters and things, smoke, drink, and in short do anything lovely female, clothed in all the freshness of youth and surpassing beauty, leans upon the to 'kill time.'

All drew around the table, seating themselves on whatever came handiest. Four of them had rolled up to the table some kegs, which from their weight were supposed to contain nails. 'Now, said Hatch, how shall we play-every one for himself?

thought he would step over to his store and see man's look-a woman's word? See it here! that everything was safe. As he went in he walked up towards the fire.

General Antelligence. CALIFORNIA:

The resources of California are well set forth in the Report of the Governor, Mr. Bigler, and of the Secretary of State, on the Census of 1852. This document occupies upwards of fifty pages. Among the facts contained in it are the following:

In two years the population has increased thirty per cent, and it is thought that within ten years it will have at least quadrupled.-There are, as at present estimated, 308,000 inhabitants, the annual increase being thirty-nine per cent greater than that of the other States. If this augmentation continue, it is not difficult to prophecy the formation of a great empire on the Pacific in a very short space of time, composed of a population singularly varied in its elements, and stimulated, without gold mines even, to the successful industry peculiar to our institutions.

The productions and capital of the State, as reported in the document in hand, do not include those of El Dorado, of Calaveras, and in part of two other counties, among the most wealthy and productive of the State, returns not having yet been made. The estimated value of capital employed in Agriculture, Real Estate and Improvements is as follows: Capital employed in Stock, Farming and Gardening, \$1,857,502 Do. in Fruits, Orchards, 366,910 Do. in Improvements and Real Estate, 6,348,346 Do. Farming Utensils, 125,940 Do. Milling, 240,850 Estimate of El Dorado and Calavaras Counties, 10,000,000 Live Stock, 18,903,714 Agricultural Products, 6,162,040 Land in cultivation, 1,107,480 Estimate for El Dorado and Calaveras, 5,000,000 Horticulture, Manufactures, &c., 1,150,000 Quartz Mining, 5,871,000 Plaster, 4,174,419 Other, 3,851,623 Estimate for El Dorado, 2,500,000 \$108,522 56 Total,

In the above estimate no land except in actual cultivation is included.

As there seems to be some misunderstanding about the law recently passed regulating volunteer compa-nies and the militia we publish below a synopsis of the law, as prepared by the Clerk of the House of Dele-gates, and printed in his " Sketches of the Acts" passed at the last session of the Legislature:

THE MILITIA.

An act providing for the enrollment of the militia. by the Commissioners of the revenue, the aboliton of musters and a re-organization of the volunteer corps. The several commissioners shall annually make out an alphabetical roll of all persons in their districts between eighteen and forty-five years, liable to be en-rolled under the laws of the United States, with the regiment and company to which each person belongs. The adjutant general to prepare the rolls and attach ners. The said rolls, when nstructions to commissio make out, to be filed in the clerk's office, with an affidavit by the commissioners of its correctness; the oath to be administered by a justice without compensation. All masters (or mistresses) of any house, public or private, shall give the names of persons resi-ding with them liable to be enrolled, with other propang with them habe to be enroled, with other prop-er information. If any person, when required, refuse to give information, or falsely give it, he shall pay ten dollars for each person concerning whom enqui-ry is made, or whose name was concealed or improp-erly given. Said fine to be recovered before any jus-tice, in the name of the regiment. Said rolls to be open to inspection for one month without fee. The clerk of the court, when required by the command-ant of a company or Colonel of a regiment shall an-nually make out a roll of all persons so enrolled in any company district, and shall forward to the adjutant general, within two months after the filing of said rolls, a return of the strength of each regiment in his county, city or town. The form of the return to be furnished by the adjutant general shall annu-ally consolidate the returns of the clerks, superintendant of the Virginia Military Institute, and comman-dant of the Public Guard; and on or before the first Monday in November, make out a return to the Governor of the condition of the militia, with the ordnance, arms, equipments, &c., specifying those in the hands of the volunteers and those in arsenals or magazines.

When a company is without a commissioned offi-cer the commandant of the regiment to detail any officer to fill the vacancy until an election is held.— The cavalry and artillery not belonging to any volunteer battallion shall compose one regiment of cavalry and artillery.

From the 1st on the 19th section inclusive of the 25th chapter the 15th section, from the 18th to the 29th section inclusive and from the 33d to the 51st section, inclusive, of chapter 37; and from the 3d to 16th section, inclusive of the 31st chapter are repealed except in cases of war, insurrection or invasion. The 5th, 6th, 7th and 10th sections of chapter 26th of the Code, are repealed.

Two or more volunteer companies, agreeing to be mustered together, shall constitute a battallion and elect a major; four or more may constitute a battallion and elect a lieutenant colonel and major; six or more may constitute a regiment and elect a colonel,a lieute-nant colonel and major. Which officers shall be commissioned by the Governor, and rank above officers of like grade in the line. The field officers of volunteer regiments to be elected by the commissioned officers. The law further provides who shall constitute the staff in the battallions and regiment. Companies of artillery and cavalry drilling with carbines or mnskets, may unite with infantry in the formation of battallions or regiments, subject to the orders of the

officers, or may unite and form battallions or squad-

strength and vigor to thousands of the most debilitated individuals, many who had lost all hopes, and been abandoned to die. By its complete invigoration of the nervous system, the whole faculties become restored to their proper power and functions, and the fallen fabric of life is raised up to beauty, consistency and duration, upon the ruins of an amaciated and premature decline, to sound and pristine health. Oh, how happy have bundreds of misguided youths been made, who have been suddenly restored to health from the devastations of those terrific maladies which result from indiscretion. Such persons before contemplating

should reflect that a sound mind and body are the most necessary requisites to promote connubial happiness. Indeed, without this, the journey through life becomes a weary pilgrinage; the prospect hourly darkens to the view; the mind becomes shadowed with despair, and filled with the melancholy reflection that the happiness of another becomes blighted with our own.-Let no false delicacy prevent you, but apply immedi-

ately. He who places himself under the care of Dr. Johnston may religiously confide in his honor as a Gentleman, and confidently rely upon his skill as a Physician.

#### To Strangers.

The many thousands cured at this institution within the last ten years, and the numerous important Surgi-cal Operations performed by Dr. Johnston, witnessed by the reporters of the papers and many other persons notices of which have appeared again and again before the public, is a sufficient guarantee that the afflicted will find a skilkful and honorable physician. N. B. There are so many ignorant and worthless Quacks advertising themselves as physicians, ruining the health of the already Afflicted, that Dr. Johnston deems it necessary to say to those acquaint d with his reputation that his credentials or diplomas always hang in his Office.

### THOUGHTS AND SENTIMENTS.

.... Is religion beautiful ? We answer, all is desolation and deformity where religion is

not. .... The ability to love what is love-worthy and thus, to love the Lord as the most love worthy, is the highest privilege of a rational creature.

.... So far as we are willing to surmount our lower propensities, we are enabled to associate with our fellows on higher principles.

.... The love of ruling and the love of accumulating are the two furies which torment mankind beyond all others.

you to be :-- you are not at any time what | ling their promise. man judges you to be, only so far as his judgment is in agreement with the Divine light.

.... The fireside is a seminary of infinite importance; it is important because it is universal, and because the education it bestows, being woven in with the woof of childhood, gives form and color to the texture of life.

.... No one can be habitually and uniformly polite, without sensibly contracting somewhat of good. Whatever in any degree counteracts selfishness, so far lets into the mind its opposite -benevolence.

.... The judicial blindness of pride is seen in this, that those are the proudest who have nothing to be proud of. Such pride is the manife tat o 1 of essential self-love-of that love of self which exists where self is most vile and unlovely.

.... What a beautiful virtue is benevolence. It is a precions tie existing between man and man, as children of one common Father-a tie wholly unaffected by difference of age, station, kindred or country, and over which the artificial distinctions of a vain world have little power.

.... How can any sincere Christian doubt that where he is, there Providence has placed him? In deciding where we will go and what we will, we decide as if human prudence were everything ; but, having so acted, we cannot but know that Providence, at the least, permitted our determination; and then, and thus, it appears impossible for any true Christian to be out of his place.

BE SOMETHING. BY NELL TRUTHWOOD.

Yes, be something. Begin this very hour. You have been just no where and nobody long enough. Cast aside that 'don't care' spirit that you lossess, and stand before the world as a man !---as such, act. You can do it---be some-thing if you choose. You were not placed here to be a tax upon mankind-a do-no-

thing-far from it! Each one of us has a task allotted to us-a task which should be, if it is not, performed. Suppose our predecessor's ambitious spirit had been kept in the back-ground, just because of some trivial disappointment or failure attend-

ing its first appearance-some little discouragement at the onset; what then ? America had not been discovered! Invention, that which has awakened dormant powers and nerved the soul of man for some great undertaking-broken the spell which was thrown over inanimate

nature, rendering it a 'thing of life,'-had remained dormant. 'I will be something!' spoke the brave persevering spirits of the past-and they became something. Obstacles, it is true, were in their

way, but they overcame them. Poverty stared them threateningly in the face-they met undaunted its fierce gaze. Friends, when most needed, forsook them-still they remained unshaken in their purpose. The spirit of perseverance had been awakened, and despite of all obstructions, it would go on and onward until the goal for which it had started was obtained.

There are a few, at the present day, who are imbued with a spirit of the past-who have .... You are at all times what God sees | said-'I will be something,' and are fast fulfil-

To such as have made this resolve, I would say-on, on my friends in the course commenced. Yes, on! though the fiery bolts of heaven should threaten to consume you! On through the hurricane of strife-the wild sea of passion-the storm of treachery! On through all, until you arrive at the summit for which you started. Would that this world con-

tained a greater number of these 'be something spirits. Young man-young woman-ye who have just launched your bark upon the waves of 'life's uncertain sea,' listen, I entreat you, to what I

am about to remark. Would you be happy and useful in this life be something; be not afraid to undertake great things, you can accomplish them. The summit of Fame can be attained; the road that leads to it may, at time, be intricate, and al-

most inaccessible-vou may lose sight of the far-off and dimly-lighted beacon that crowns its summit: ebon darkness may surround you; you may lose your way, yet you should not despair. Commence anew in the chase, and then on-on, with the desperation of a wrecked seaman, while swimming towards the distant, yet

he thinks, can-be-obtained shore. As the ambition of the mariner urges him over the waves that threaten to engulph him, so let your ambition urge you over the stormy billows of the sea of life, until the point-the point for which you have started, is reached. One word in conclusion. Arise, ve that have become discouraged at trifles-bestir yourself; the spirit of ambition is in you, throw it

When within a few steps of where the men were sitting, he started back in horror. Before him sat seven men, half crazy with drink and the excitement of playing cards .--There they were within a few feet of the fire just described-and four of them seated on keys of

powder ! Barclay-who was a very heavy man-had pressed in the head of the keg on which he sat, bursting the top hoop, and pressing the powder

out through the chinks. By the continued motion of their feet, the powder had became spread about the floor, and now covered a space of duced. two feet all around them. Mr. Putman's first movement was towards the door, but recovering himself, he walked up

towards the fire. Should either of them attempt to rise-he thought-and scatter a few grains a little further into the fire place, where lay a large quantity of live coal !

At that moment Hatch looking up, and seeing Mr. Putman with his face deadly pale, gazing into the fire, exclaimed : 'Good God, Putman what ails you,' and at the same time made a motion to rise. 'For Heaven's sake, gentlemen do not rise,' said Mr. Putman. 'Four of you sit on kegs of powder-it is scattered all around you-one There are two buckets of water behind the bar.

But keep your seats for one minute, and you are saved-move and you are dead men ! In an instant every man was perfectly sobered-not a limb moved-each seemed paralysed.

In less time than we have taken to describe this thrilling scene, Mr. Putman had poured-the water on, and completely saturated the powder on the floor, and extinguished the fire, so that an explosion was impossible. Then, and not till then, was there a word spoken .- True Flag.

### THE BELGIAN LAW OF DIVORCE.

Some few years since, a young Belgian lady, fresh from her convent education, appeared in society, captivated a young fellow-countryman, with well-oiled hair and patent leather boots; and after an acquaintance of a few weeks married him. The happy pair sojourned, as is often the custom, abroad, with the father and mother of the lady. The young wife was a gay lady, and her husband was quite as gay a lord. At every ball and party in the capital they were present; and, as married ladies are especially

selected by continental gentlemen for what they call "adoration," the young wife, although she got no more of it than she liked, was honored

with considerably more than pleased her husband. The latter remonstrated-the lady rebelled-and "my wife's mother," ut solent matronæ, support her daughter. The husband settled the matter by putting on his hat and retiring to his own paternal mansion. The martial feud was now intense, and the conjugal couple were only of the same mind touching one single subject-application to the tribunals for a divorce. This was done; but the Belgian law will allow of no such annulling of a marriage contract until the angry parties have renewed their demand for a divorce, once every vear for three years. Our young couple nourished their wrath during this triennial period of probation-thrice made the demand-and

were duly summoned last year to hear consent given that they who had been one should thenceforth, and forever remain two. From different sides of the court the married pair witnessed the untying of the knot; and, when they were free, they passed out the common portal into the public street. Approximation fired forth to the world. God did not design for it forth to the world. God did not design for it to remain dormant—useless; therefore he sent to the lady in token that there was no malice

The comparative agricultural wealth of California thus appears: In horses she is in advance of fifteen of the States; in mules of twenty-six States; milch cows of twelve States; of work-oxen of eight; value of live stock of twenty States; barley only equalled by New York; potatoes next to New York and more than one-half of all produced in the Union; wheat, greater than ten of the States: oats. three-fourths of the other States; hay, exceeding nine of the States; mining, without a parallel; fruits, exceeding all the States in variety, and one-half of them in quantity pro-

We remember being in Paris when a returned French Californian came to the American Legation to get fresh papers. He had made money in San Francisco, but he could not live in Paris any longer. Everything was policed up to the eyes, so restricted, so slow, so wanting in business economy. "Some architects," said he "have shown me plans for the Californian cities ! I told them the Americans would build the cities in about the same time a French architect would be thinking about the plan. They cannot comprehend such a community here in Paris. I must get back to it."

How far California has been profitable or unprofitable to the country at large, the expenses of the war, the costly intermediate agency of ships, steamboats and wagons, the diversion of labor and capital from the other States all considered,-is not now the question. The extemporation of an empire, brilliant and successful beyond comparison in history, is exhibited in her marvellous career. Her annals are unparalleled. The proverbs of the past in politics are fairly upset by them. The power of self government, the energy of individualism, were never so fully displayed as in the career of the men hurled on her shores; digging and legislating, building, plowing, trading, with a rapidity and success that make all Europe stare, and even excite remark in this latitude.

The trait of individualism in California the grandest product of her community. It is worth more than the gold mines. In Europe everything is amassed. The religion is centralized, whether at Rome or Oxford; the hardest muscle is absorbed and wasted in armies; business is overlaid with clumsy mediaval restrictions, that render it comparatively lifeless. England accepted ; the passport system is in full force along with the electric telegraph even, and the social and industrial limbs are bound down with custom. But what a contrast is California to this! How personality sticks out! How self-substentation is exhibited in universal labor, the distinction between fine and coarse professions being abrogated and all being literally hard working men! How the power of physical restitution is exhibited in the rebuilding over and over again with almost magical quickness of burnt towns and cities. The romance of Arabian fabulists has been

equalled in the career of California-a nation being the hero, and not some lucky prince .---The people but yesterday setting up their pioneer business, are already starting an expedition to Japan. The hoary automata of the pastthe Chinese-to the number of twenty-five thousand, are in California, learning the industrial and political ways and means of the onward people. We shall soon hear of their influence at home. The revolution, whose success is just reported, from China, will not stop at a change of dynasties, with such a new influx of light from our Pacific coast. So, too, Japan ; whether the ports are opened peaceably or not to out rds the future . They atters no

ODD FELLOWS' PROCESSION

Monday last being the day appointed by Cale-donia Lodge No. 23, I. O. O. F., of Shepherdstown, for a public procession of the order, our town was thronged, at an early hour, with strangers and visitors from different sections of this and adjoining counties. The procession formed at the Lutheran Church and proceeded thence, accompanied by the Shepherdstown Brass Band and other music, to the Presbyterian Church, where an able and effective address, suited to the occasion, was delivered by the Rev. Mr. FINK, of Martinsburg, Va., to a large, brilliant and intelligent audience. The performances of the band as the processic n moved onward to the church was excellent, filling the heart with gladsome feelings as their enchanting notes fell in quick succession upon the delight d ear. The singing of the choir, which formed a prominent feature of the exercises before and after the delivery of the address, was also of a fine character, and reflected credit upon all participating in the same. Altogether the occasion was one of which the order have just reason to cherish a grateful recollection, and should serve to stimulate the membership to increased activity and zeal in be-

#### SUDDEN DEATH.

HARPERS-FERRY, May 23d, 1853.

Stephen Smith, a boatman from Shenandoah County; died suddenly at this place on Wednesday ast. His death may be attributed to the following causes. Feeling indisposed, he went to a physician for the purpose of getting bled. The doctor at first refused, but after repeated solicitations on the part of Smith, urging that for some years past, it had been his custom to get bled regularly every spring, the Doctor at length reluctantly complied with his wishes. Feeling greatly relieved by the operation, he went immediately and imbibed freely of rum. He then sought his companions, with one of whom, he commenced wrestling. In the scuffle, the bandage was removed from his arm, which bled again very freely. His arm was bandaged a second time; and he indulged in frequent potations of liquor between that time and evening .-Towards night, however, the bandage was again removed, and the incisions being opened afresh, bled as profusely as at first. This continued for some time, and growing weak from the loss of blood, he sat down upon a curbstone. Finally, hecoming still weaker, he arose and proceeded with feeble steps to the Drug Store of Dr. Hammond, who again dressed his arm. He shortly after fell into a state of insensibility, from which he did not recover, and in that state was conveyed to the Mayor's Office, when he died in some twenty-five or thirty minutes. He was 45 or 50 years of age. Fortunately he leaves no wife or children to mourn the loss of a husband and father, thus suddenly

.... There are many people in the world who are afraid even of a beautiful and sublime idea, because it happens to be at variance with some idea to which they have been long habituated. Such people, by way of doing good, as they imagine, in checking the liberty of thinking, do much harm; for thought restrained makes men headstrong and reckless; but thought encouraged makes men disposed to do all things orderly.

## POWER OF IMAGINATION.

A very extraordinary circumstance happened lately at Wilts, England. The landlady of the White Hart inn, observing the appearance of blood trickling down the legs of an eminent land surveyor of the neighborhood who was at her house, she asked him if his nose had been bleeding. He replied ' no ;' but on seeing the same appearance himself, he clapped both hands to his stomach, complained of a violent pain there, and exclaimed, 'I'm a dead man ! I have burst a blood vessel! send for a surgeon, immediately !' upon which he fainted away, was strip ped and put in a warm bed. Two surgeons soon arrived, and examined the body. They

found no apparent orifice from whence the blood issued; but upon searching his clothes, which seemed to be very bloody, they found in his vest pocket a bottle, which had been filled with red ink. This unravelled the mystery, as the cork had been forced out; and is a strong proof

of the astonishing effects of imagination in sus-pending the human faculties. of a wise man.

#### TALKING OF OTHERS.

It is very difficult, and requires all " the wis dom of the serpent and the harmlessness of the dove," to talk of people, without violating the laws of charity or of truth; it is therefore best to avoid it. By substituting books, and the

vast variety of characters and opinions which they present, you give yourself and your companions ample scope for the expression of your thoughts and feelings, for the discussion of various questions, for sharpening each other's wits by collision of sentiment, correcting the judgment by comparison and discrimination, and strengthening the memory by repetition and quotation.

FEMALE SOCIETY .- By all means mix as often as you can with refined female society. A dignified, social intercourse with intelligent fe male society has a happy effect upon the char-acter. It tends to soften down asperities, promote cheerfulness, refine the feelings, and to save a young man from vicious company. It should be more reserved than we generally allow with our own sex, but never more trifling. ..... Silence is the wisdom of a fool, speech

### JEFFERSON ELECTION.

We have just gone through in Jefferson, one of the most triangular contests, as connected with any election in which party differences could have been possibly considered, that has ever occurred within its borders. Many of the Democrats, as to their Congressional nominee, were luke-warm and indifferent whilst others remained from the polls altogether, and some few voted for the Whig candidate. The Whig party on the other hand, outside of Harpers-Ferry, were not only united, but most bitter and vindictive in their hostility to Mr. Faulkner. They seemed to revel in a luxury of delight, at the bitterest persecution which ever fell upon the head of any man in a Congressional contest. There was no charge too monstrous, and no efforts too great, could it effect his overthrow and enure to the advantage of their own candidate. Both parties went into the contest, hoping, expecting and laboring to triumph. The result is before you, and Mr. Faulkner's majority is four! Never before did the friends of a candidate get such a backset, as the announcement of the result gave to the friends of Mr. Boteler. To talk of his carrying the county by less than one hundred was regarded as simply absurd. The greatest effort that could be made, was made, to give him the county, and as to the old"Unterrified" we doubt whether they are done voting for Boteler there yet. But, in the significant language, of a venerable President of one of the former associations of our county, that is now among the things that were, in introducing the precincts of the county he said we had not only the "unterrified" but another equally worthy of consideration, which he should designate as the "Lion's Den." And when these men, as fearless as the monarch of the forest, shook from them the mere trammels of party, and stood up like men to vindicate kim who had stood by the rights of freemen, in the hour of their greatest danger, we could but think that the Representative who was true to the rights of the people, had his surest and his best reward in receiving their approbation, and his own convictions of having at least done something to merit their good opinion. The majority of Mr. Faulkner at Harpers-Ferry, is unprecedentedly large, being 198 and we therefore give notice that the "Unterrified" is nowhere, when the " Lion's Den" is about.

As to the County Canvass, the Editor of this paper having been presented as one of the candidates for the Legislature, we have said nothing heretofore to commend him to the people, and simply desire to say but a word in explanation as to his defeat. Were it true, we might say he was only beaten because he

## VIRGINIA ELECTIONS.

We subjoin such returns of the election in Virginia on Thursday last, as have come to hand, for Members of Congress, the Board of Public Works, and Members of the Legislature, as have any appearance of being authentic. So far the Whigs have gained in the House of Delegates, two members from Jefferson, two in Fauquier, one in Clarke and one in Rappahannock. The contest in the 7th District, as between ex-Gov. Smith and Mr. Snowden, is likely to be close, though the returns thus far indicate the election of Smith by a small majority. In the 5th District, Bocock and Averett, Democrats, are in opposition to Wootten, Whig, yet the returns would seem to insure the election of Bocock, the caucus nominee, by a very respectable majority. These two districts have been regarded, our own being decided, as the only doubtful districts of the State, and it is therefore but reasonable to expect that Virginia will have in the next Congress an entire Democratic delegation. The feuds engendered by the Congressional contest, will reduce to some extent our Democratic majority in the Legislature, as in some of the counties where these disaffections have existed, the Democratic vote is by no means out, whilst the Whig vote, from just opposite causes, is an unusually full one. ## RESULTS.

As the returns of the election come in, there are nany iucidents of entirely dissimilar character .---The emotions of success and defeat, of pleasure and disappointment, are continually struggling for the ascendant. We know of no instance in which we have een more strikingly impressed, with these contending impulses, than in the election of John W. Minor to the House of Delegates from the Whig county of Loudoun, and the defeat of BUCKNER ASHBY in the Democratic county of Clarke. The former for the first time in its history, we presume, has returned to the Legislature, a sterling Democrat, a most estimable gentleman, and bne who will render most useful and efficient services to his people. The County of Clarke upon the other hand, has defeated one of the best and purest men of the Democratic party, an unswerving Democrat, who has stood by his party in sunshine and storm, and the last of men who could have expected such a fate at the hands of his friends. Of his worthy competitor, Col. Morgan, we say not a word, (as we are under a promise to sojourn with him a week or two in Richmond,) but we still love Rome more than Cæsar.

WOE UNTO THE PROPHETS.

Since the Congressional Canvass opened, the hig papers of this Congressional District, have d a horde of the most unscrupulous corresponents that have ever figured in the newspaper press Virginia. Their charges, however, have generalbeen so outrageous, their malevolence and their alignity so bitter, their statements so unfounded, at they have answered their own arguments, and ce old Dogberry written themselves down as asses, endeavored to impose upon the people such inchausen stories, that it was clearly manifest ev didn't believe them themselves. As one among ese specimens, we desire to bring upon the witess stand "POTOMAC." a correspondent of the st Free Press. In speaking of the rumor that as said to be current in the District, that Mr. aulkner, from "local considerations," would get a rge majority at Harpers-Ferry, this modern wisecre says:

" The local question together with other underhandmovements-to the contrary notwithstandingannot vary the usual result, in my opinion, ten votes t this precinct. I will stake my reputation as a Pro-

#### THE LATE ELECTION.

The Richmond Examiner thus refers to the recent election, and the little interest manifested by the people of the State generally, as to its results:

The important canvass which ended yesterday evening, was the most stupid and uninteresting even known to the State. Does any reader recollect another time when the approach of a great election was viewed with such apathy and indifference? The candidates for Legislative and Senatorial honors themselves have appeared, for the first occasion in the themselves have appeared, for the first occasion in the memory of man, completely careless, whether they were elected or beaten. The Whig party in nearly all the Congressional Districts went into the fight so weak and enfeebled by past flagellations, that they were scarcely able to stagger up to the polls; while the masses have been less afflicted with the notion that the disorders of the world awaited their correcting hands, and more bent upon the setting of tobacco plants and the seeding of corn hills, than we have ver seen them in the bonny month of May.

rally Whigs1-come up Democrats1-Friends of Drck1-Friends of Tow1-Friends of HARRY1 to arms1 to arms! to arms !-- What month in the year has not ad to hear-(and to echo, alas)-these detestable halloos-these hackneyed slogans of partizan warfare, invented and contrived for the benefit of selfish and rascally politicians, who never did or will care a straw for any living thing besides themselves. How flat and odious have they got to be. How doth our sonls grow sick and turn wearily away from the paper, when called on to befoul our pens once more with them. These are our own sensations-what must be those of the long suffering population at whom such exclamations have been lau ched continually since Lord knows when? Certain it is, that constant use has at last robbed these conjurations of town.

their power. Our serpentine bumpkins hearken not to the fugles of their charmers, blow they ever so loudly and so wisely. To the most appalling cries, they answer with a snore. They hear the most dreadful and sublime prophecies without so much as a momentary interruption to their bacon-chawing; and when one begins a patriotic appeal about Lanner, blood, serried ranks, trumpets, old guard, gallant champions and peerless statesmen-why, the w if they listen at all, absolutely begin to grin. en-why, the wretches

The truth is, the people of Virginia have been done to death with politics. For the last five years no sea son has been exempt from this ubiquitous plague .-Eelections elections elections! In summer and winter, in heat and in cold, in moist and in dry, this people has been ordered and re-ordered to turn out and go to the polls. Election of Judges, election of Senators, and delegates, and Constables, and Presidents, and Magistrates, and Night-Watchmen, and Surveyors, and Congressmen-there has been no end to them. The extra sessions of the Legislature and double Reform Conventions, between them, have drained the pockets of the people, exhausted their practice and wholy taken their time for years. The ublic mind has become utterly sick of politics, and looks forward to a respite of two years with as much happiness as Ixiox ever did to nap upon his wheel .--

ST. LOUIS REMOVED TO THE COUNTRY.

the full vote of Virginia again.

Much apprehension has long been felt in St. Louis that the action of the waters of the Missouri, where they enter the Mississippi above that city, will eventually wear away the Illinois shore to such an extent as to force a new channel for the great Father of Waters, and thus leave St. Louis some five or six miles out in the country. 'The present flood, as usual, is tearing away the bank, having washed off a mile and a half of the telegraph line near Alton, with all the land on which the poles were planted. The editor of

the Alton Courier says: "As much abrasion of the Illinois shore for the next ten years, or even five years, as has been occurring for a few years past, and the lakes and lowlands

#### JOAQUIN, THE NOTED MEXICAN ROBBER.

The San Francisco Herald gives a romantic account of Joaquin, the Mexican robber. He recently stopped on the Salinas Plains, and the owner of the house asking him, in the course of the conversation, if he had heard of Joaquin, the person addressed, put his hand to his heart, and with grave politeness and penetrating glance, replied-

"Sir, I am that Joaquin, and no man takes me alive, or comes within one hundred yards of me, with these good weapons."

Without any further ceremony, and perfectly unexcited, the robber went on to relate the reason of his conduct in his late career. He said that becoming lisgnsted with the frequency of Mexican revolutions, he had come to California to end his days in peace, as an American citizen, but that he had been oppressed, robbed, and persecuted by the Americans in the Placers; had lost \$40,000, been driven from a piece of land, which he was working with an American companion; had been insulted and grossly maltreat-ed without justice; had been flogged—and he was determined to be revenged for his wrongs, four-fold. He had robbed many, killed many, and more should suffer in the same way, or else he would die in the struggle. He appeared then to grow very serious, and become excited, but subsequently added, that, hearing a large reward was offered for his head or his living body, he rode into Stockton, disguised, walked leisurely around, with his scrape thrown over his shoulders, reading the different hand-bills posted up about town. Coming to one of these, in a public thoroughfare, where \$5,000 was offered for his capture, he wrote in pencil underneath : "I will give \$10,-000 myself-Joaquin"-and leisurely rode out of the

#### EMIGRATION TO LIBERIA.

The past year has been signalized by a remarkable increase to the number of emigrants actually sent to Liberia, as well as in the increase and diffusion among the colored population of a willingness to emigrate This is a gratifying indication of a change in the

prospects of African colonization, and it is greatly to be wished that this favorable disposition should be encouraged, and that nothing should occur to check either the emigration or the desire for it. For many years this important enterprise was suffered to drag along very discouragingly, but few emigrants being sent, and few offering. Yet, in spite of all drawbacks notwithstanding the pancity of funds, the widely diffused prejudice entertained by the blacks against coization, and the unrelenting hostility of a large class of our own educated citizens, the colony has prospered, its population increased, and enlightened and wisely conducted republican government has been established, recognized formally by several important European powers, who are about sending di-plomatic agents thither; the republican sway has been extended to include the whole slave coast, the Nothing but some great occasion will ever bring out native tribes have been brought to subjection, the foundation of a navy established, and the agricultural and commercial resources of the country liberally stimulated. But, better than all this, the unwillingness of the American free colored people to emigrate is beginning to give way, and the sympathies and feelings of a large portion of the community are en-listed for the cause. Thus, at present, all things favor colonization, and if the requisite funds can be procured, a very great amount of progress in the work may be speedily effected. To this end let those who

### THE LUTHERAN SYNOD.

The General Synod of the Lutheran Church in the United States assembled in this place on Saturday morning last, according to the adjournment in the city of Charleston, S. C., three years ago. The Rev. Dr. Schuberen, the presiding officer of the last Synod took the Chair, and the Rev. Mr. DEIM. filled the Secretary's place. The Synod, was permanently organ-ized in the afternoon. by the election of the Rev. Dr. BACHMAN, of Charleston, S. C., as President, the Rev.

C. A. HAY, of Penn., Secretary, J. D. MARTIN, of Ohio, Assistant Secretary, and P. S. MICKLER, of Pennsylvania, Treasurer. No other business of importa was done on that day. Previous to the morning ad-journment, the Church Extension Society, formed in rederick, Md., and proposing to raise \$50,000 as a

building fund, held a meeting, over which the Rev. Dr. MORRIS, of Baltimore presided. On Monday, there were several interesting discus sions on matters connected with the welfare of the Church. Reports from the district Synods were received, and other important documents were presen-ted and received. The district Synods of Western Pennsylvania, Northern Illinois and Texas were taken into connection, according to applications made to that effect.

Tuesday, the discussion upon the application for a connection of the Synod of India with the General Synod, was terminated by the expression of a readiness to receive that Synod into connection whenever its delegates should present themselves. The discus-sion on the expression of the liturgy drew out expressions of opinion from several leading clergymen of the Church, but there was no decisive action in reference to the questions

The meeting of the foreign Missionary Society was held on Monday evening. A number of addresses were delivered, and a fine collection afterwards taken up. The Home Missionary Society met on Tuesday night, and, after the delivery of the addresses, the splendid sum of \$1000 was raised by contibutions for life memberships, in addition to which there was supposed about \$100 in the boxes. Much of this success was owing to the ability with which the Rev. Dr. KUETZ conducted this practical part of the proceed-ings.- Winchester Republican.

#### TTEMS FROM THE CENSUS.

Many items of interest may be gathered from the tables accompanying the Report of the Superinten-dent of the Consus for 1850, from which we make the following condensed statements, for the benefit of those into whose hands the Report may not come.----It is estimated that 2,210,828 of the present population of the United States are foreigners. LATE AND INTERESTING FROM AUSTRALIA.

The California papers contain advices from Hobart Town to the 25th of February. The gold fever at Sydney was more exciting than ever, and far exceeding that of 1849 in California. It was mpossible to hire men to work at the most exorbitant rates on board vessels at anchor in the harbor, or to ship sailors for the voyage, all being carried away with the predigious accounts from the mines.

The Victoria mines have yielded, up to the end of last year, four millions and ninety thousand ounces of gold, equal to £19,373,000. The Methourne Argus

"Within the last few days three unparalelled me "Within the last few days three unparalelled mass-es of gold have been brought to light—such as per-haps the world has never seen before. They were found in a spot never much frequented hitherto, and there are reports of numerous smaller lumps having been found in the same locality. The largest of these three great lumps weighs a hundred and thirty-four pounds and a half, of which upwards of a hundred and twenty nounds are none gold. The other two and twenty pounds are pure gold. The other two lumps weigh 93 lbs. 2 oz. 5 dwt., and 83 lbs. 9 oz. 5 dwt, respectively, only a very small proportion being quartz. Americans are living on terms of amity with the most rabid Britishers, and we have an account of a meeting at which one of our countrymen acted as Se-cretary. It was a meeting of indignation against the government on account of outrages practiced by some of the contsables, and by a meddling license commis-sioner. The meeting was large, spirited, and mani-fested much independence in its resolves. The go-vernment restrictions and police over miners was very strict. No liquor was allowed to be sold in the mines

The latest foreign advices, state that a revolution is pressing in the Chinese Empire, and that the city of Nankin—the third in point of size—has fallen into the hands of the rebels. The rebel army is commanthe hands of the rebels. The rebel army is comman-ded by the new aspirant to the throne belonging to the old dynasty, which was overthrown by the prede-cessors of the present Tartar sovereign. Nankin was the capitol under the old line of Emperors, and was then a place of greater size and splendor than it is at present. In the event of the success of the revolution-ists, it will again become the seat of government.— The very fact that a city of so much importance, should fall into the hands of the revolutionists, indicates the strength of the movement as well we indicates the strength of the movement, as well, we should say, as the very brittle tenure by which the present Emperor holds the sceptre. The accounts say he has made a general call upon his people "for help ;" but the Celestials having of late years become some-what modernized, may desire a change, with "all the world and the rest of mankind,' and may wish to try how a new ruler-a full-blooded Chinese, of the ancient regime-will work again.

The next news from that far off country will be very important.

EASTER DAY.

Here is the manner in which Easter Day is decided for each year: The tradition goes that the resurrection of our Lord took place a little after the Vernal Equinox and followed a full moon. Now, as it is thought that the equinox comes annually 21st of March, the day after the equinox when a full moon occurs is observed, and Easter is fixed at the Sunday which succeeds this day. It follows that Easter cannot arrive sooner than the 22d of March. for the earliest date for the full moon of March is the paschal moon or of the equinox. From the same date the latest possible for the celebration of Easter is the

didn't get votes enough, but his great misfortune was in having got too many, and in doing that, his friends, unfortunately, paid too dear for the whistle. He received with but here and there an exception, the united Democratic vote that came out, and fully, if not more than one hundred Whig votes, making an aggregate of some 57 over Mr. Faulkner, who carried the county, and sixty-odd over Mr. Boteler, and yet was defeated. This result has been a matter of surprise to some, and almost unintelligible to others. But, as Leesburg. he was in the unfortunate condition, of having a fire Goresvill in the front and the rear, an examination of the poll will easily demonstrate, that he has many reasons to Waterford be thankful that the result was no worse. He bows Mt. Gilead. with great deference to the will of the people, and Purselville .... upon calm reflection is very much inclined to think, Lovettsville what they have just expressed, that his services are Snickersvile ... too important at home, to be possibly spared for a Gum Spring ... visit to Richmond. He therefore enters anew upon the discharge of his accustomed labors, with the expression of his most grateful appreciation for the liberal support that was given him, and to each and all does he feel under as many obligations, as though he had been elected.

On behalf of our worthy and respected colleague, Mr. SEEVERS, we must be permitted to say, he by no means received that support which he had the right to expect, and his party were under every obligation to have given him. Every vote he lost, was a blank vote to his colleague, and no matter what the motive, as the result has proved, this course of procedure was most detrimental to the interests of the party, and has given to the Whig party two representatives from Jefferson. Mr. SEEVERS, however, has borne his discomfiture like a man, and we doubt not the day will soon come when his many estimable virtues will, be properly appreciated and suitably rewarded.

### FOREIGN APPOINTMENTS.

We publish on our first page, the Foreign Appointments recently made by the new Administration. which have received generally the approbation of the country, for the propriety and fitness of the selection. The missions and chargeships which remain unfilled, are France, China, Turkey, Portugal, Rome, Sweden, Venezuela, and the important consulates at London, Glasgow, the Barbary States, and Marseilles. Among those appointed, it will be seen that Virginia has been particularly fortunate. She receives four important and lucrative positions, and those who have been the recipients, are men eminently deserving, by their great ability and high moral character, of representing their country abroad with credit to themselves and service to their country. The Chargeship to Denmark is to be filled by a citizen of our own county, the Hon. HENRY BEDINGER, who will go hence with the good wishes and kind feelings of every man who enjoys his acquaintance. He has by far too long been the dray-horse of his party, of whom it was expected to be always ready for work, and this appreciation of the great services he has rendered to his party and his country, is alike creditable to the head and the heart of the President. The appointment of Lt. Gov. Leake, Mr. Meade and R. G. Scott of Richmond, will each and all receive the approbation of the Democracy of the State, and whilst their loss to the Commonwealth is to be regretted, yet the dignity of their country and the honor of Virginia, will be nobly maintained by such gallant sons.

Mr. BEDINGER, we learn, may possibly start upon hi mission at an early day, though the exact time is not as vet ascertained. Lt. Gov. LEAKE will have of course to resign his office, and if we mistake not. GEORGE E. DENEALE, Esq., the Senator from Rockingham, will succeed him as President pro tem, of the Senate.

CALIFORNIA.

There have been several arrivals from California since our last, bringing intelligence to the 1st of May. The City of San Francisco has again been exposed to terrible calamity by three fires in almost immediate succession, but they were fortunately subdued with a triffing loss, compared with the destructive effects of previous conflagrations. The efforts of the firemen to save the city from threatening flames are spoken of in terms of enthusiastic commendation by the San Francisco journals. The news from the mines continues to be of an encouraging character, and discoveries of gold are said to have been made in new localities, which promise great results. The usual quota of crimes diversifies our record of life in California. By these arrivals we have more recent intelligence from the Australian Gold Regions, which confirms the previous statements of the abundance of mineral wealth in that quarter. NEW YORK CRYSTAL PALACE .-- The tone of censure

which the New York press has indulged in regard to the management of the Crystal Palace has induced the architects of the building to put on a large number of extra workmen, and report in writing to the directors that the building will be completed so as to be ready for the reception of goods by the middle of June, and the directors thereupon state that they feel confident they will be enabled to open the exhibition between the 1st and 15th of July. 'The charge for admission is fixed at fifty cents. On Thursday, the stock of the company advanced eight per cent., in consequence of the extra efforts now making to finish the edifice. The scenes of immorality and dissipation in the vicinity of the Palace are eliciting no little denunciation. The Express says:

"In the vicinity of the Crystal Palace, Sunday dissipation attains its climax. Grog shops, bowling saloons and billiard rooms, of all sorts and descriptions, have started up there, and we are credibly in formed that the daily receipts of one of these houses do not fall short of \$1,000 !"

#### STEAMBOAT RACING.

A letter from New Orleans, under date of 18th in stant, thus refers to the fearful extent to which steam boat racing is pushed on the Mississippi. The writer a respectable gentleman, estimates the aggregate bets made on the result of the race between the two steamers named, at half a million of dollars !- and lest the money at stake and all the other exciting influences might not be sufficient to push the contending boats to their utmost speed, the tar alluded to was the agent, used without stint, to give the highest intensity to the boiler fires. We know, through later advices, that the race was run without any loss of life. The risks to the passengers, however, must have been

great, and while, in this instance, they have escaped without harm, we trust that the exemption will not be taken as a warrant for the repetition of so dangerous a contest :

"Everything is going on smoothly. The only excitement in town at present is the great steamboat race against time, in which, to confess the truth, I am very much interested. So far, the "Shotwell's" time s better than that of the "Eclipse." We hear of them every few hours from every station on the river where there is a telegraph. I understand the 'Eclipse' took no freight but wood and one hundred barrels of tar.--The 'Shotwell' had the same quantity of combustibles, but not so many passengers-the former having two hundred. The reason of the race is that the season is just commencing, and the fastest boat gets the passengers. The people will lay over three or four days to go up to Louisville a few hours quicker, and run the risk of being blown up. I went down to the Levce to see the Shotwell off. There must have been ten thousand persons at the different boats for the same purpose. The departure was something of a sight; a gun fired for her to get out into the stream, another to start, and when she had gone, still another to time her by. At the report of the last gun it was really amusing to see the people taking out their watches and betting furiously. It is said that there is not less than half a million pending on this risk of human life.

MARRIAGE SCENE IN INDIA .- Bayard Taylor write from Bombay as follows:

Last night, on my way home from the Botanic Garden, I met a magnificent marriage procession in the streets of the native town. First came a very large number of beautiful children, in open carriages, e pearts and spangles on their dresses glittering in the light of torches, which were borne upon long poles, and waved in riotous jubilee to sounds of music. Behind them were boys in jewelled robes on horseback, with servants holding golden fringed umbrellas above their heads. The music—a piercing medley of fifes, drums and lutes-came next, and the bridegroom mounted on a white horse. He was a man of about twenty, clad in splendid robes of white silk, all emidered with gold. His turban gleamed with pearls, and his cheeks and forehead were covered with gold leaf. He was a living El Dorado, but sat so grave and motionless on his horse, looking straight bef

him, that he might have been taken for a bedizzened statue. A servant holding a silver screen resembling a fan, walked on each side of him, and behind him came the dowery borne on men's heads. It was contained in twenty or thirty houses, arranged so as to form a quadrangle, with a temple in the centre of all.

SPLENDID CATTLE .- A lot of cattle passed our office esterday on their way to the World's Fair in New fork, which has probably never been equalled in the Inited States. They numbered fifty head, and their average weight, as we understand, was 1,900 and 2,000 pounds! They were sold by Isaac Shelby & Son to . W. Taylor, of New York, and are destined as above stated. Kentucky can well risk her reputation, as

#### WIDOWS' BOUNTY LAND CLAIMS.

It appears that a large number of widows whose econd husbands having died, suppose their claims to bounty land on account of the services of their first sbands are still valid. This supposition, it will be seen by the following, is an error:

A RATTLESNAKE REVIVAL .- The Syracuse (N. Y.) Star is accountable for the following:

"In the State of Ohio there resided a family consisting of an old man by the name of Beaver and his three sons, all of whom are hard "pets," who had often laughed to scorn the advice and entreaties of a pious though very eccentric minister, who resided in the same town. It. happened one of the boys was bitten by a rattlesnake, and was expected to die, when the minister was sent for in great haste. On his arrival he found the young man very penitent, and anxious to be prayed with. The minister called on the family, kneeled down and prayed in this wise: 'O, Lord, we thank thee for rattlesnakes; we thank thee because a rattlesnake has bit Jim. We pray thee to send a rattlesnake to bite John; send one to bite Bill; send one to bite Sam; and, O Lord, send the biggest kind of a rattlesnake to bite the old man, for nothing but rattlesnakes will ever bring the Beaver family to repentance."

#### RAILROAD MEETING.

On Tuesday last there was a meeting of the Stock holders of the Alexandria, Loudoun, and Hampshire Railroad, in the town of Alexandria, and the follow ing notice of the proceedings we copy from the Alex-

andria Gazette : The Stockholders of the Alexandria, Loudonn and Hampshire Railroad Company, held their first meet-ing yesterday at Sarepta Hall. The usual husiness attending an organization was transacted; thid a very interesting discussion of the policy and prospects of the Company took place, upon a resolution in relation to the surveys for a route, which was finally laid

upon the table. Lewis McKenzie was unanimously elected president of the Company, and James McIlhany, of Lou-doun, and George H. Smoot of Alexandria, Directors

on the part of the Stockholders. Messrs, Robert H. Miller, of Alexandria, Noble S. Braden, of Loudonn, and John Bruce, of Winchester were appointed the Committee to examine into the affairs and proceedings of the Company, and report thereon at the general meeting to be held in this place on the third Thursday in October next.

The by-laws of the Manassas Gap Railroad Compa-ny were adopted as far as applicable; and Messrs. Cassius F. Lee, David Funsten, and A. Sidney Tebbs, were appointed a committee to report to the next meeting such changes therein as they deem expedi-

The annual meetings of the Company were ordered to be held in Alexandria, on the third Thursday in October in each year.

#### HOGS AND WHISKEY.

The Cincinnati Atlas has the following paragraph : The largest distillery in the United States is at New Richmond, Ohio, on the river, about twenty miles above Cincinnati. There are two distilleries in the town. At the larger there are now made 125 bbls. of whiskey per day; at the other 80-that is, New Richmond furnishes the world 205 barrels of whiskey every day, or about 70,000 barrels per annun.-In the larger distillery there are now 9000 hogs; in the other 7000. These hogs are changed three times a year, which makes 27,000 from one, and 21,000 from the other, or 48,000 hogs from New Richmond annually. At certain seasons of the year, from the character of their food, or from other causes, epidemics prevail among the hogs. Last winter over 3000 died. In the last two years about 12,000 hogs have died at the two distilleries. These hogs are not a dead loss-their carcasses are rendered into lard oil. The business of the manufactory, at which this "sav-ing process" goes on, amounted the last six months to over \$5,000. Last year 450 barrels of lard were made from the hogs that died in the pens.

In the larger distillery there are now in store about 100,000 bushels of grain. It is a spot as inviting to great rats as ever was California or Anstralia to gold loving men. The trade between Cincinnati and New Richmond supports a steamer, which makes daily trips down and back. The freight is mainly hogs and whiskey. But a considerable business is done, also, in flour, of which at the two distilleries there are ground every day about 100 barrels.

A NEW WHEAT .- The London correspondent of the National Intelligencer says :- A very singular discovery has lately been made in France by M. Fabre, a gardener of Ayde. The herb ægilops, heretofore con-sidered as worse than useless, grows abundantly on the shores of the Mediterranean. It produces a species of grain resembling wheat in form, but much smaller. In the year 1819, Mr. Fabre sowed of this grain, and he found the produce bore a close affinity to wheat; that produce he sowed the next year, and the yield was still more like wheat. He went on sowing the produce of each year the succeeding year, un-til he has now succeeded in getting a fine crop of wheat and of as good quality as can be wished for. Thus he has proved that a wild and mischievous weed can be educated into excellent wheat. We find this in a foreign agricultural journal. Your readers must exercise their judgment as to the credit due to the statement.

MELANCHOLLY DEATH RESULTING FROM SPIRITUAL MONOMAWIA. -- Miss Nancy Sherman, of Plymouth, Mass. who died on the 15th instant, it is stated, storeed her-corrected weekly by SAML. HARTLEY, AT THE DEPOT. 17, self to death. She had been quite noted as a medium of spiritual communication, and by constant ministra-tion in that office had become so completely imbued BACC with its hallneination as to be whely unfitted for the ordinary duties of life. About a month since she at-tempted to hang herself, but was prevented from ac-complishing, her design. She then announced that the spirits had forbidden her eating any more and CLO FEA' FLO GRA for three weeks she studiously alstained from partaking of food, living on water alone, although at times so tortured by the pange of hunger as to writhe LAR PLA A Love What-Henry A. Pamilton was last week engaged recording in the books of the Probate Court of this county, one of the longest wills, perhaps, of re-cord in this State, if not in the United States. The will is that of the late Gen. James Taylor of Newport, Kentucky. It covers 21, pages of royal octavo, close-ly (and we may add well) written. The fee for recording it amounted to \$21.80. It relates to property valued at \$4,000,000, and gives freedom and property to more than 20 human beings and their postcrit As the testator was the owner of real estate in twenty six counties of this State, the will has to be recorded in each of them .- Yema ( 0.) I tried various articles to heal it, but inflammation get-ting into it caused large quantities of matter to collect, and the limb was quite stiff. A friend of mine asked me if I had tried the Mustang Liniment, to which I replied in the negative, but thinking it might do some good, was induced to try it. It had only used onehalf bottle when the inflammation began to be removed, and the wound to heal. Now it is entirely healed and and the wound to heal. Now it is entirely healed and the hair is growing over the wound, making it look as well as ever. Hoping that others may be benefitted by a trial of your valuable compound, I remain yours, CHAS. E. RUSSELL COUNTY, Ala., Feb. 1st, 1953. In justice to the proprietors, and for the benefit of the afflicted, I feel it my duty to state publicly, the re-markable cures that have been effected in my family by the Mustane, Linux and the state of the stat the Mustang Liniment. A negro of mine had at was called a Bone Felon or Whitlow on her midwhat was called a Bone Felon or Wintlow on her mid-dle finger; the pain was most intense and excruciat-ing. The inflammation had been so extensive that the whole finger had become almost a mass of corrup-tion, and the only hope of saving her hand, and per-haps her life, appeared to be to have it cut off. As her general health was very delicate, the physician advis-ed us to try the Mustang Liniment a few days, till she could be sent to a surgeon in Columbus, as it could do no harm, and might prevent mortification. To the do no harm, and might prevent mortification. To the astonishment of the doctor, and myself, the pain soon ceased, the inflammation subsided, and the wound rapidly healed. The finger is now perfectly well and

IMPORTANT FOR BOATMEN & BOAT-Builders, Railroad and Bridge Builders. I HAVE invented (and an applying to use so far as to fully test its properties) a Check or Rubber, for the purpose of checking and holding permanently a boat when entering the locks or any other close place, through which it may pass, on the several canals.— The invention is as follows, viz: A sill of proper, di-mensions laying across the boat, in the centre of which is a follorum or axle to work a lever or tiller on, paralis a fulcrum or axle to work a lever or tiller on, paral-

is a fulcrum or axle to work a lever or ther on, paral-lel to and on the top of the sill are two pieces of tim-ber, of suitable size, for the purpose of sliders; at the centre above named, in the sill, is also a pivot fulcrum or axle for the lever to take hold of and work the slid-ing pieces in straight lines with, and in opposite di-rections to, each other, jutting the ends of the sliding pieces out of the sides of the boat and thus check its because by rubbing against the mason work of the

rections to, each other, jutting the ends of the sliding pleces out of the sides of the boat and thus check its headway, by rubbing against the mason work of the lock. The lever when placed on the two sliding pieces will be in form as in Euclid, book 1st, propositions 27th, 23th, and 29th, of a line falling on two straight lines, and the changes by the required moving of the straight line producing at the same time different an-gles at their junctures. The same movement of the two sliding pieces may be effected by other fixture, such as the placing between the two sliding pieces a cog-wheel, to turn with a crank or lever, or by placing in a line with them something operating as a jack-screw, or other something of the kind which will pro-duce the required operation, such as two pieces, one end of each piece made fast to a sliding piece and the two ends joined, so as to form an obtuse angle, which when drawn to a straight line will produce the same operation on the two angles at opposite sides, such as would form the rhambus or rhambaid, all of which will answer the same purpose; rollers may be placed in different ways on the end of the sliding pieces that juits out if such be required. I think the above will sufficiently describe the form of the check, and the line or lever falling on the other two straight lines or nine are will forthy illustrate the fluxional co-efficient or

## A HOME PICTURE.

"Look on this picture, and then on that."

"Father is coming !" and little round faces grow long, and merry voices are hushed, and toys are hustled into the closet, and mamma glances nervously at the door, and baby is bribed with a lump of sugar to keep the peace, and father's business face relaxes not a muscle, and the little group huddle like timid sheep in the corner, and tea is despatched as silently as though speaking were prohibited by the statute book, and the children creep, like culprits to bed, marvelling that the baby dares to crow so loud, now that "Father has come!"

"Father is coming !" and bright eyes sparkle for joy, and tiny feet dance with glee, and eager faces press against the window pane, and a bevy of rosy lips claim kisses at the door, and picture books lie unrebuked on the table, and tops, and balls, and dolls, are discussed, and little Susy lays her soft cheek against the parental whiskers with the most fearless "abandon," and Charley gets a love pat for his "medal," and mamma's face grows radiant, and the evening paper is read, (not silently but aloud.) and tea, and toast, and time vanish with equal celerity, for jubilee has arrived and "Father has come !"

SIMPLIFYING MARRIAGE .- The ceremony of tving the nuptial knot is very much simplified in the Hoosier State, as the following scene will show :---"What is your name, sir?" demands the ustice. "Matty." "What is your name, Miss?" " Polly." "Matty, do you love Polly ?" "No mistake." "Polly do you love Matty?" "Well, I recky." " Well, then," concludes the efficial dignitary. "I prononnce you man and wife, All the days of your life." ... Julius, is you better this morning?" 'No, I was better vesterday, but I got over "Am der no hopes of your discovery ?" "Discovery ob what ?" Your discovery from der convalescence which

Five Hundred Dollars Reward. MPRESSED as I am with the controlling influen which is exercised by the fine arts upon the dire

tion and destiny of human affairs, it has given me infi-nite pleasure to witness the bountiful manner in which, from time to time, painting and statuary has been en-couraged and rewarded by the councils of the nation. But while the acknowledgment is due to the discerning and worthy patrons of the noble arts, it is an equa source of humiliation and sprrow to behold the appa rent apathy and indifference with which they seem to regard the incomparably more valuable creations of poctry.

To see them adorn the walls of the Capitol with the To see them adorn the wais of the Capitol with the glowing revelations of the pencil, and decorate the public grounds with the costly CHEF D'auvines of the chisel, is an omen of good which will be hailed and applauded by all as a cheering pledge of the progress of refinement. But, whilst they lavish their thousands upon these immobile products of canvass and marble, and hence the form a remark for the wave serviced and bronze, they offer no reward for the more exalted, more enduring and renowned ovations of the pen.-No fostering hand from these high places has ever yet invited the Promethean fire of poetry to animate the history of our country, which with all its harmony of form and wonder of proportion, lies asleep around the humble vault of Mount Vernon, ready to spring into life and beauty at the first kindling touch of this genial aspiration.

It surely were a work of supererogation to introduce the proofs that crowd the records of the past to show how far above all others stands the "divine art" of poe-Now far above all others stands the "divine art?" of poe-sy. What are all the paintings, statues, and regalia of Versailles, of Fontainbleau, & the Tuileries, compared with the "Marseilles Hymn?" What the kingly pano-ply of gold and gems heaped up in the Tower of Lon-don; what the collections of the Royal Academy, or even the time hallowed shrines of Westminster Abbey, when compared with the senses of Rume and Dibdon when compared with the songs of Burns, and Dibden, and Campbell? Or what has the world that we would take in exchange for "Hail Columbia" and the "Star-Spangled Banner?" Well might the British statesman exclaim, "Let me but write the ballads of a nation, and I care not who makes its laws." As far as the living breathing man is above the cold,

nsensate marble that is made to represent him; as far as the radiant skies of summer are above the perisha-ble canvass to which the painter has transferred their feeble resemblance, so far is poetry above all other arts that have their mission to console and elevate and inspire the immortal mind of man. In view of these facts, and considering the lamenta

In view of these facts, and considering the famenta-ble paucity of patriotic songs in my distinguished and beloved country, and with the hope of being the hum-ble means of arousing a proper public feeling upon this interesting subject, I have been induced to offer, and do hereby offer, the sum of five hundred dollars as a prize for the best National Poem, Ode or Epic.
