WASHINGTON.

ED STATES SENATE.
April 24, 1838.—
A vote in favor of the Amended Bill was taken up at 1 o'clock in the afternoon in defense of the adoption. It said it was now just in a day that the Indians were declared. All the battles had been waged, and even much more United States had been upon Texas upon the other. "All the wishes of that young Republic had been met and disbanded—exercised their jurisdiction, and through her borders—Mexico, revolution, independence, and all the movements—said his course was partitioned no feeling of hostility—he would do nothing that would injure Mexico in a war with the United States."—
The Indians had been deprived of justice and required to interfere with their rights, for no man could deny the fact that she was a state properly to assert her rights, but could not wish for her Texas upon her borders. If it Mexico in a serious conflict with Texas, he said he should prove that the Texas belonged to the United States, and Spain, and France ceded to Texas. All that originally France now legally belonged to Texas. France claimed it until Louisiana to us in 1819. The Texas was asserted as the true line as 1805. Our Commissioners sat upon this line in 1819. (Here Mr. Preston read a speech of Mr. Monroe, Mr. Jefferson, alledged that the United States bounded on the South West by the Treaty of 1819 was being measure in opposition to what were read from Mr. Adams' speeches and reports established the boundaries of the Territory of the U. S. States.)—Each a question as was made his part of our territory formed of Mr. Preston's argument.—of those who opposed the argument that we might not have Texas would give a preponderance to the Southern States. That argument arose and all the South if Texas went to the United States, and the right to receive Texas, as now when we could. This subject discussed by Mr. Preston. His thought it desirable should belong to us.

RECAPITULATING FAVORS.—The Christians in the Sandwich Islands have established a monthly concert to pray for the American health!

A schooner employed as a lighter was capsized in Mobile Bay on the night of the 19th instant, and the captain, his wife, and all the crew perished. It is stated that Captain Howes, of the ship Pronoutis, just from Liverpool, was on board the lighter, and also perished.

The late winter has been very destructive to the grain in England. So much have the wheat fields been injured by it in many districts, that large breads have been ploughed up, and the land devoted to other purposes, from the utter improbability that a crop of wheat would be obtained.

George Dobson has been appointed Consul of the Republic of Texas for the port of Mobile, in the State of Alabama, and has been recognized as such by the President of the United States.

ED STATES CASE.—The Report of the Committee to whom two months ago certain corruption against the Hon. W. H. Davis was called up, on motion of White, of Tenn., chairman admitted. The Report was by the Senate, and in the end, to the Senate, without the Report, recommended all improper conduct.

ED STATES AND MEXICO.—We perceive, at length, that the gloom and despondency which has hovered over the relations in the UNITED STATES and

of immediate hostile disposition on either side, has passed in this change in the procedure we have had to our readers.

It was yesterday presented to the House of Representatives from the part of the United States, a report, in which it was resolved that a resolution of that body, which further information as to the relations with Mexico, which make part of the relations of Foreign Relations, now obtain a copy to publication. We have glanced at them, however, and we find that a direct proposition made by the Government to refer the differences between the Republic and the United States to arbitration of a third power, the offer has been accepted by the United States.

NATIONAL INTELLIGENCE.—A marble bust of Mariano Benavides has been placed in the Capital at Washington, D. C., pupil of Thorwaldsen, said to be a work of extreme

skill.

We have had the pleasure of handling a few of the new \$1 and \$2 Notes on the Bank of Virginia. They are beautiful specimens of the art of engraving. They are payable in specie at the distant offices. We learn from the Examiner, that the issues from the Farmers' Bank will be out in a few days. The amount of these small notes is to range from two to four per cent. on the capital stock of each Bank. Under this regulation, we shall probably have about \$200,000 worth in all.

U. S. NAVY.—It appears from the Navy Register just published, that the number of national vessels of the United States is 53, besides the steam frigate Fulton, which, for some reason or other, is not included in the list. She is however a powerful vessel, and we wish we had more like her. Of the 53 included in the list, one (the Pennsylvania) is rated at 120 guns, seven at 80, four at 74, one at 54, fourteen at 44, two at 32, eleven at 20, three at 18, six at 10; the remaining seven are under 10 guns. There are 50 captains in the Navy, 49 masters commanding, 27 lieutenants, 40 surgeons, 24 passed assistant surgeons, 33 assistant surgeons, 40 masters, 16 chaplains, 161 passed midshipmen, 200 apprentices, 220 rating-masters, 220 boatswains, 220 carpenters, and 210 sailors. The Marine Corps comprises 1 colonel, 1 lieutenant colonel, 4 majors, 12 captains, 16 first lieutenants, and 20 second lieutenants.

We learn that on Friday the 6th instant, between 6 and 700 barrels of Turpentine were destroyed by fire at Hamilton in Martin county. The house and its contents were entirely consumed, and the building was entirely destroyed. The remains of the house were removed to the water, and was not recovered at times from this severe treatment, by direction of the physician, who frequently found nature yielding to severity, until the term of her imprisonment expired.

In our State prison, she is equally incorrigible. No punishment has yet been inflicted, or kind persuasions that have been offered, can move her to obey. She has worn with but one or two brief intermissions, for nine of ten years, undiscovered. She entered very young as a sailor before the mast, and has crossed the ocean in that capacity eight or nine times. For stealing she was some time since condemned in the N. Y. State prison for two years—fifteen months of which time was passed in solitary confinement. While there, she steadily refused to work, and every effort of punishment or persuasion failed to have the least effect upon her. The solitary confinement was of no avail to the warden, who then resorted to the use of floggings, which was of no avail.

AN UGLY SIGHT.—To see a Van Burenite running to a broker with a bank note, having it shaved at seven per cent, to get a specie quarter of a dollar to pay postage on a letter, during him for a newspaper subscription of three dollars. How he internally praises the glorious and happy operations of the specie humbug.

(St. Louis Republican.)

A new Professorship was established at the late meeting of the Trustees of Pennsylvania College, and Rev. John G. Morris (of the English Lutheran Church) of Baltimore, selected to fill the same. A better selection could not have been made.

We advise Mr. Van Buren and his Cabinet to go out on the exploring expedition. [Fred. Acrea.]

They are about joining another exploring expedition bound for the head waters of Salt River. We know, that our friend of the Arenas will not insist on a change of their destination. The Republican, Mr. V. B. organ in Baltimore, professes to be thankful that things in Connecticut are no worse. The editor has as grateful a disposition as the poor man who, when his wife had four children at a birth, was thankful that there was no more.

MISSCELLANY.

From the Baltimore Gazette.

GRONCE WILSON, THE FEMALE HORSE THIEF.—The female in men's clothing, who was taken up for horse stealing a few weeks ago, was sentenced to two years' imprisonment in our Penitentiary, where she is now enduring the penalty of the crime. The only name that she will give is George Wilson.

This female is certainly a very extraordinary individual, and her personal adventures, if we could be induced to relate them, would doubtless form a volume of uncommon interest. But she is silent in almost every particular in relation to herself. A few things mentioned by her fellow prisoners have been repeated, and they only create a desire to know more of her character and history. At a very early age, say thirteen or fourteen, she assumed male attire, which she has worn with but one or two brief intermissions, for nine of ten years, undiscovered. She entered very young as a sailor before the mast, and has crossed the ocean in that capacity eight or nine times. For stealing she was some time since condemned in the N. Y. State prison for two years—fifteen months of which time was passed in solitary confinement. While there, she steadily refused to work, and every effort of punishment or persuasion failed to have the least effect upon her. The solitary confinement was of no avail to the warden, who then resorted to the use of floggings, which was of no avail.

FELT.

This very celebrated and unsurpassed
English Race Horse and Stallion,
RECENTLY selected by me, is English
for his brilliant career on the race-horse
market. He is a bold, hardy, fleet, courageous
and running performer, who, in every
respect, is a true horse. He is a steady
rider, with fine bones, great power and
endurance, and makes a bold, strong
and graceful appearance.

He is now in full flower, and is
now in full condition, and the most
handsome, fleet, courageous and bold
horse in the country. His size and bone,
great beauty, and size and bone, both pedigree
will be well known. Let me assure you, he
will be a most valuable horse, and will be
a credit to his owner.
