-AWFUL CONFLAGRATION. ELEVEN SQUARES DESTROYED BY FIRE!

We have only time this morning, before going to press, to announce the ocve-fire which-ever before occurred in our unfortunate and ill-starred city. Last night at about 8 o'clock, when the wind was blowing almost a gale from the South East, the fire broke out in an old wooden building in the rear of the house on the South East corner of Dauphin and Conception streets, owned by Mr. Pinto, and spread from street to street and from quare to square, till FIVE HUNDRED.

BUILDINGS were reduced to ashes! By this awful calamity, probably two andred families are turned into streets, many of whom are poor and pennyless, and will depend entirely upon public charity for a place to rest their neads, and for bread to appease their hunger. The Sames extended with such raidity, that but little property could be saved, and many, very many, have lost their all. We are unable this morning to descend to particulars. It is impossible to convey any idea of the distress produced. The removal of the sick and consequent exposure, excitement and alarm, ve fear will in many instances be produc-

tive of fatal results. The origin of the fire is attributed to incendiaries : and we understand that two persons were seized on suspicion and odged in jail. Can it be possible there Persons at a distance may rely on having their orders faithfully executed, at the chapest rates.

WESTERN LUNATIC HOSPITAL.

Instances of cure sometimes occur at our Hospital, so remarkable, of such ouching interest, and so eminently illustrative of the wisdom and humanity of his noble charity of our State, that we hould feel we were doing a public wrong by suffering them to pass unnoticed .-Such an instance has just occurred in the case of a young lady from one of the counties below the ridge. When she was brought to the Hospital, four months orce we had no thought of ever seeing her restored. Her condition seemed to be one of utter hopelessness, and painfully exemplifying, in the prostration and debasement of every faculty and every sense, the

truth, that

"Man is not the arince of creatures". Itut in teason; fait that, he is worse. "Than horse; or dog, or beast of wilderness." The history of her case was truly affectng. The first estrangement of her mindwas discovered after long and anxious watching at the sick bed of a sister, and its early symptoms were a fondness for dress of her previous disposition. This, bowever, was soon followed by self-neglect, and seemingly settled and hopeless mania. On Saturday last, we were called on, as a member of the Court of Directors, to receive an application for her discharge. We could scarcely realize that she was the same being. Her neat, modest, intelligent

and lady-like demeanor, almost forbade the thought. But it was even so. Reaher rejoicing friends and relatives, in all affectionate brother, who came for her,

> GALVANIC TELEGRAPH.—We observe that the managers of the Great Western Railway have already adopted the new galvanic mode of communicating intelli-gence upon their road. The following from a London paper, and the Liverpool Mercury, in introducing it, states that the rate at which the electric fluid travels has been discovered, by accurate experiment, to be not less than 200,000

"The space occupied by the care con taining the machinery (which simply stands upon a table, and can be removed at pleasure to any part of the room) is litle more than that required for a gentle man's hat-box: The telegraph is worked by merely pressing small brass keys (similar to those on a keyed bugle,) which acting (by means of galvanic power) up on various hands placed upon a dial-plate at the other end of the telegraphic line, as far as now opened, point not only to each letter of the alphabet, as each key may be struck or pressed, but the numericals are indicated by the same means, as well as the various points, from a comma x) upon the dial, which indicates that when this key is struck a mistake has been made in some part of the sentence telegraphed, and that an erasure is inten-A question-such, for instance, as he following: "How many passengers tarted from Drayton by the ten o'clock ain?"—and the answer, could be transmitted from the terminus to Drawton and back in less than two minutes. It is the intention of the Great Western Railway Company to carry the tube along the line as fast as completion of the rails takes place, and ulti-mately throughout the whole distance to Bristol. The machinery, and the mode of working it, are so exceedingly simple

that a child who could read would, after an hour or two's instruction, be enabled to transmit and receive information." ---

A SINGULAR CASE OF BIGAMY .- A curious case of bigamy recently occurred in England. COMMENT. -- As soon as General Jack son had determined upon the grand "Experiment," and transferred the "deposites" to the State banks, he began to exhor and encourage, and, by leans of public moneys, actually bribed, these same banks to flood the country with their worthless rogs! The banks were lauded in his an nual messages; the Secretary of the

with this request, put the national funds "Globe," "turned the Treasury of the na-tion itself into capital for stockholders!" During this time, the party throughout the Union were the most clamorous advocates for STATE BANKS! In every State in the Union, not even excepting the ard-money State of New Hampshire, wherever the Administration party held the ascendency, multitudes of these "pet" State banks sprang into existence, and in-

creased with rapidity unprecedented in the annals of banking history. In three or four years, more banks were had been incorporated for the preceding thirty years! Their number had increased from about three hundred to upwards of six hundred and seventy ! and the banking capital of the country had swelled from about one hundred and fifty mil lions to nearly FOUR HUNDRED MILLIONS

OF DOLLARS! The following are some of the banks which have been created by this pretend-

ed anti-bank party:
The State Bank of Alabama, with a caoital of some ten or twelve millions of dollars! All the banks in Arkansas!-All the banks in Missouri, the very birthplace of Benton's "Gold Humbug!". All the banks in Indiana! All the banks in Illinois! and all the WILD CAT and other banks of Michigan, were created by the

same party. In New York, during the reign of the 'Albany Regency," and under the sanction of Van Buren, Marcy & Co. "more than (we quote from the Albany Even-ing Journal) one hundred banks, with innumerable Loan Lombard and Trust Companies, were incorporated !" "These rivileges. The charters were granted for their own benefit; and for the benefit of their associates and dependants." In Mississippi, a Jackson Legislature

increased the banking capital of the State from less than one to thirty-nine millions In Louisiana, with a Jackson Legislature, the banking capital was increased from six to fifty-four millions of dollars!

In Pennsylvania, still another Jackson State, the banking capital was increased rom fifteen to nearly sixty millions of dollars! These facts cannot be disputed. We hallenge a refutation. They are attested by the records of the country; by the messages of the President ; by the official

eports of the Secretary of the Treasury and by the Journals of the Legislatures of more than half the States of the Union. The "Bank Mania" which has wrought such incalculable mischief upon this country was the natural offspring of Jackonism. It is so written with the indelible finger of Time upon the never-fading pages of History, and all the protestations of Mr. Van Buren and his friends cannot after it one pot or tille. The president's Buren party "first multiplied the banks beyond all precedent, then stimulated and debauched them, and now their efforts to cast off the polluted victims of their lust must and will recoil upon their
