[BY REQUEST] THE TRUE POLICY.

Whether Mr. Nicholas Biddle did or id not practice the correct policy while at the head of the Bank of the United States, it is guite certain that he fre-quently preached it. Witness the following passage from one of his published essays: The corrency of the U.S. consists of

coin and of bank notes, promising to pay coin. As long as the banks can always pay the coin they promise, they are usebecause, in a country where the monied capital is disproportioned to the means of employing capital, the substition to make its exchanges with less coin and of course saves the expense of that coin. But this advantage has by its side or by sanguine persons anxious only to increase their profits, without much pecuniary interest or personal responsibility in the administration. The constant tendency of Banks, therefore, is to lend too much, and to put too many notes in circube injurious, because the increase of the mixed mass of money generally occasions a rise in the price of all commodics. The consequence is, that the high price of foreign productions tempts foreigners to send us a large amount of their commodities, while the high price of domestic productions prevents these foreigners from taking in exchange a herefore, you buy from foreigners more than they buy from you, as they cannot take the paper part of your currency, they must take the coin part. If this is ne to a considerable extent, the danger is that the banks will be obliged to pay so much of their coin for their notes as to leave them not a sufficient quantity to answer the mand for it; in which case

the banks fail.

To prevent this, a prudent bank, the moment it perceives an unusual demand for its notes, and has reason [The first section of the bill extends to fear a drain on its vaults, should imappellate jurisdiction to Superior Courts mediately diminish the amount of its fon a Jarge scale, when the banks of a stock of coin necessary for their banking the lest of bank management.

One motion of Mr. Faulkner, the bill to a room, where the physical caster, and a few from Philadelphia, made experiments upon it with the Galvanic Battery. Electrical machines, &c. The wind pipe was cut open, and a tube was iting the amount to be raised under the bill to \$11.484. was established; when the Galvanic Batment, as that sum in addition to what tery was applied, Kobler moved his arms had thready been expended, was ample and legs, his left hand was raised from the for the completion of the bridge over the box upon which he lay to his breast, and his fingers were open and shut, as if fo catch something, his features expressed every passion, his eyes were opened and closed rapidly, his jaw moved as if eating, and he breathed with sufficient power to blow out a candle five times in rapid succommunication from the Cashier of the cession. This was a kind of setificial life which of course was only temporary.

> When a dead man opens his eyes and looks about, moves his limbs, throws his arm upon his breast, grinds his teeth, and tries to catch you, it requires strong nerves to witness the spectacle.

> If any of those present ran out of the room after seeing his eyes, &c., and reported to the people that Kobler was brought to life again, we would tell them they have nothing more to fear of the man whose whole life, if known, would probably un-fold a tale of horror, whose lightest words would harrow up your souls; and that the reason the physiciens could not restore a permanent instead of a temporary life, was that he was too dead when brought in -he was very dead."

To am't of cash on hand July 1, 1839, 938 84 two-story house with 4 rooms, cellur, closets, will be running water. This land is naturally very productive, and much of it is now in good heart. The timbered land, overgrown with black and white oak, ash and walnut, denotes 435 00 the natural quality of the soil. My terms will be one-third in cash, and long credits on the de-

Another Tract of 100 Acres, and a MERCHANT MILL. This land (formerly Kean & Powell's) also is limestone, and immediately adjoining the above described farm.

70 acres are cleared, and the land of a superior quality, embracing 20 acres of meadow. 30 acres are in excellent timber. The improveots ere a barn, grahary, new stone dairy, sunds house, and excellent garden. The large dwelling house has recently been destroyed by fire accidently, but as the chimnies, foundation, cellar, and some of the materials remain, it cellar, and some of the materials remain, it could be rebuilt for comparatively a small sum. The situation is in the midst of a planted groveness two fine aprings, one of which rises in the dairy. The mill is a stone building, 45 feet by 48, having a pair of wheat bures and a pair of country runners, together with Carding Machines. The fall is 16 feet and the stream con-

there being a raitroad from thence to Baltimore, the entire cost of transporting a barrel of flour to that city is only 53 cents. The land is easily cultivated, lies well, and is adapted to corn, wheat, and grass. The great Valley Turnpike passes, these tracts. For any further information apply to me, near Newtown, or to my brother D. W. Barron, residing in Winchester.

BRONCHITIS, a disease which is animally avecping thousands upon thousands to a premature grave, under the mistaken name of CONSUMPTION, is always curen by it. The unal symptoms of this disease (Bronchitis) are Cough, Soreness of the Lungs or Throat, Hoarscoess, Difficulty of Breathing, Asthma, Heetle Feere, a aplitting up of Phegin or matter, and the Ferer, a splitting up of Phlegin or matter, and sometimes blood. It is an inflammation of the fine skin which lines the inside of the whole of the wind a skin which lines the inside of the whole of the wind tubes or air yeasels, which run through every part of the Langs. This Expectoriant immediately supersises the Cough; Pain, Inflammation, Fever and Difficulty of Breathing, and produces a Tree and easy Expectoration, and a cure is soon effected.

It always cures Asthma—two or three large doses will care the CROUP or HIVES of Children, in from fitteen minutes to an hour's time. It immediately aubilias the violence of HOOPING COUGH, and effects a speedy cure. Hundreds who have been given up by their physicians as interable with "CONSUMPTION," have been restored to perfect health by it.

D. Jayne, a regular student of the Medical University of Pennsylvania, and an experienced, we essful practitioner of medicine, I was prepared to his different medical preparations, much more highly than the great majority of those which are extensity entoglised. On trial of them in, my own family, and some of them personally, I have more than exclused their favorable, anticipations. They are what they prefers to be not quark mostrums but skilfully prepared antidotes for some of the most afflictive of numan diseases. I know that they are highly esteemed, and frequently prescribed, by some of the most respectable of the regular practitioners of medicine in this aity and elsewhere, and I do not healiste to commend them as a valuable addition to old materia medica, and a safe, as well as eminently useful remedy for the diseased."

A gentleman of the highest standing in this fawn, who has been dreadfully afflicted with the Blind Piles for the last 26 years, called upon me and freely confessed to me his situation. After describing the severity of the complaint, he remarked hy had not been as well for 20 years past as he was at that moment. He had used one bottle only of Hays' Liniment. To use his own words, he said "the whole human funity, who were thus afflicted, ought to be made sequainted with this medicine."
