JUDAH TOURO. The death of this eminent citizen of New Orleans has already been an manced. He was a native of Rhode Island, and was born on the 17th of June 1775, and was consequently about 78 years and 7 months old at his death. He went to New Orleans in 1802, when twenty-seven years old, and strange

thence by death, ergels when serving as a volum-teer on the plain of Phalmette, under Gen. Jacon, son, against the british, when he was severely wounded, he never passed beyond its limits. Mr Topro was of the Hebrew faith, and unmarried. His large formne, the reward of his own exertions, enabled him to gratify the kindness of his reelings, by giving largely, but in secret, to the poor of his adopted city. No deserving applicant for assistance was ever rejected by Mr. Touro, no matter what his position, religion or nation might be. In spite of his great liberality, his fortune is estimated at nine hundred thousand dollars, which he

to say, from that day until the hour of his removal

has disposed of in the same catholic spirit which governed all his acts while living. No man was ever more universally respected by his follow-citizens than Judan Touro. "In the moral loveliness of his useful and honorable life," says the New Orleans Delta, "he reflected credit on human nature, and did honor to the religion of the

chosen people of God." The New Orleans Della of the 24th ult , contain the last will and testament of this benevolent man from which we make following extracts having reference to residents of this city:- [Richa ond Mail I nominate and appoint my trus y and esteemed triends, Rezin Davis Sheyherd of Virginia, Aaron Keppell Josephs, of New Orleans, Gershom Kur-sheedt, of New Orleans, and Pierre Andre Destrac Cazenave, of New Orleans, my Testamentary Executors, and the detainers of my estate, making, however, the following d stinction between my said executors, to wit: To the said Aaron Keppell Josephs. Gershom Kursheedt and Pierre Andre Destrac Cazenave, I give and bequeath to each one

separately, the sum of ten thousand dollars. And as regards my other designated executor. say my dear, old and devoted friend, Rezin Davis Shepherd, to whom, under Divine Providence, 1 was greatly indebted for the preservation of my life when I was wounded on the 1st of January, 1815. I hereby appoint and institute him, the said Rezin Davis Shepherd, after the payment of my particular legacies and the deb's of my succession, the universal legatee of the rest and residue of my estate,

movable and immovable. I give and beneath five thousand dollars to Miss Catharine Hays, now of Richmond Virginia, as an expression of the kind remembrance in which that e-teemed friend is held by me. I give and bequeath to the Misses Catharine Harriet and Julia Myers, the three daughters of Mr. Moses M. Myers, of Richmond, Virginia, the sum of seven thousand dollars, to be equally divided between them.

I give and bequeath the sum of seven thousand dollars to the surviving children of the late Samuel Myers, of Richmond Virginia, to be equally divided between them, in token of remembrance.

A VOICE FROM THE TENTH LEGION. The Valley Democrat, published at New Mar-

kel, Shenandoah county, thus speaks of the Cabi-The cabinet has not excited that respect and deference which men of established reputation and national fame have always produced over the public mind; on the contrary, a deep-rooted prejudice exists in the minds of the masses in regard to them, and if not counteracted by the President, perpicious consequences must be the result. The antecedents ct a majority of them are anything else than that which the democratic party should glory in. Mr. Guthrie was fished up from the deep mire of obscurity, but iar better would it have been for the demo-cratic party, if he had remained there as he has brought disgrace and contempt upon the party .-Mr Marcy is an able man, but an intriguer, and deeply skilled in the mancavres of the corrupt politicians of New York. Caleb Cushing, a renegade | You will see whether the room is a meanly whig has had also the effect of disorganizing the McClelland is, also, another that tails to give satisfaction, for the simple reason, that he is not free from the smell of northern freesoilism.

The Petersburg Democrat is distressed at our silence on the Nebraska bill. The worthy man where they will lead to. We have seen this same quences. We are now told, that this Nebraska bill is all and all for the South It may be so-but we were told the same thing of the original bill, before
Douglas amendment, and there is so much cheating at this Board-that we must be excused for exereiting a little caution. We are also told, that General Pierce is very warm for this Southern measure. But when we recollect his partiality for Freesoilers—and that he is frequently closeled with John Van Buren—we fear, that there is some trick on hand. The concections of Prince John and the Brigadier are not likely to redound much to the benefit of the South - Richmond Waig

POETRY.

LIFE'S BETTES HOMENTS. Life has its maneaus
Of beauty and bloom;
But the, hang like sweet roses
On the edge of the tumb.
Blessings they bring us.
As lovely as brief;
They meet us when happy,
And leave us in grief.

Hues of the morning,
Tinging the sky;
Come on the sunbeams,
And off with them fly Shadows of evening
Hang soft on the shore
Datkness on wraps them.
We see them no more So life's better moments, In bri liance appear, Pervicit, in beauty, Round us they linger,

Like shadows of even, Would that we, like them Might melt into heaven

THE SHEPHERD'S DAUGHTER. BY CHARLES SWAIN. Where the golden band of morn Touches light the singing fountain, Guides her flock along the mountain ;-

Bashful as the fa an, and fleet, She invests the world with beauty; Simple grace, and manners sweet, Dignify her humble duty. Sudden light half wreathed the earth. Robed the fields and flowers in gladness-New delights, too deep for mirth; Gentle griefs, too sweet for sadness Who this sudden charm hath wrought?-Sent this flow of bright revealings ?-

Mind, that springs with joyous thoughts! Heart, that glows with heavenly feelings. Surely, 'tis some angel strayed, Not a shepherd's daughter solely, Who hath earth like heaven arrayed, In a light and love so holy ! Oh! when stars, like drops of pearl, Glimmer o'er the singing water, There I'll woo my mountain girl, Proudly wed the Shepherd's Daughter!

AN HOUR OF PEACE. EY THOMAS MOORE.

How ealm, how beautiful comes on The stilly hour when storms are gone! When warrior winds have died away, And clouds beneath the glancing ray Melt off, and leave the land and sea Sleeping in bright tranquility-Fresh as if day again were born, Again upon the lap of norn! When the light blossoms, rudely torn And scattered at the whirlwind's will, Hang floating in the pure air still, Filling it with precious balm, In gratitude for this sweet calm; And every drop the thunder showers Have left upon the grass and flowers, Sparkles, as 'twere that lightning gem Whose liquid flame is born of them!

CHILDREN AT SCHOOL.

Will the Editor of the "Free Press," insert in his paper the inclosed article, styled "Children at School," and oblige a subscriber, who believes that the inefficiency and poor success of many of our schools and so tittle personal interest in the proper education of their children; so rarely visit the schools, and so completely neglect to co-operate with the Teacher, by enforcing a regular and punctual attendance, and a strict attention to studies at [From the New York Times.]

We have a worp of advice for parents who have children at school Your little ones are dear to you,-about as dear perhaps as the apple of your eye .-Their success at school is near your heart. with it. You are anxious to help them along -provided helping them will not too seriit can be done efficiently, at cheap cost, - be so increased that we shall be able to travpardon us for refreshing your knowledge on the subject with a few hints.

Keep them regularly at school. Absence of a day is bad. They lose one day's I ssons. They drop a stitch by that means. It deranges the teacher's plans, and makes it casier for the absence to occur again. Better suffer a great inconvenience than keep them home a day. Better spend several shillings and some hours, and do the errands yourself, than keep them home to run on them. Be sure they are punctual. Ten minutes in the morning does you no good, and them much harm. Arrived at the school-room ten minutes too late, they disturb the punctual, lose an exercise, provoke the teacher, and cultivate a miserable habit of procrastination. The matter of habit is the great objection though. In after years it sticks to a body like a boy to a runaway bare backed

herse, and the harder one runs to be clear of it, the closer it hugs him. They have lessons to learn out of school. Let it be held a religious duty that they learn them well. By this the teacher judges of your interest in their progress If they always go prepared on these home-lessons, he is careful that they get well on in their school-lessons. He feels that he is watched, he is interested for your children; and whether he means it or not-know it or not -he labors more faithfully for their advancement. If the evidences are that you pay no attention to them at home, he does his duty mechanically and only hopes for

Sometimes you are a little at leisure .-Once in a great while you don't know what to do with yourself. Then, we pray you, bestir yourself, and give up an hour to visit the school. Make, suddenly, your appear ance in the room where they are reciting .ventilated, close, and stifled pen, or a room fit for a half-fledged immortal to grow in by whose side they sit; whether they look tired, weary and languid, or as if they were careful to learn, and doing well; whether they are associating with lads or lasses fit for their company, or breathing impurities Try it a month, if you are now doing it

Having resolved to marry, he addressed a young lady whose person and manner pleased him, and was refused. So far from being overpowered with grief and disappointment, he retired from her presence laughing and in the most mirthful humor. Mounting his herse, he pursued his homeward journey, retaining his hilarity, and in the best spirits, ready to please and to be pleased. No one would have imagined that he had so lately gotten the mitten. After a time, he plucked up courage, and went to see his charmer again The fair one smilingly met his advances, and when he for the second time tendered his heart, the offer was accepted without hesitation. And now comes the strangest part of the story. He went away this time in tears instead of having that exhibitation of spirit which he felt before. THE OPPOSITION GROWING.

Tandisenssion of the Homestrad Bill In the House of Representatives has opened a wide range of debate upon the questions involved in the Nel raska Mil. Mr. Mace of Indiana and Mr. SEELTON of New Jersey, both Democrats, on Monday last, took decided ground against any breach of faith in regard to the Missouri Compromise, or the Compromises of 1850.

Mr. Mace stated that if it had been known before the election that Gen. Pierce would in less than two years occupy the ground of favor to such repeal, he never could have been President of the Ut ited States.

The subject being now fairly opened in the Hense, we shall soon find other evidences of to. Grande, let it be ever so secluded, but has been risited gard, even among Democrats, for the plighted by the Colporteur in his mission of love. faith of the country.

We consider the proposition to break the Compromise derogatory to Southern faith and honor .-It presents us in the attitude of only keeping our pledges as long as it is our interest to do so. In whis case, however, we have but the simblance of anterest, for every body knows that Southern men are not likely to carry negroes into Nebraska. The whole country is to be agitated anew for the pur- jectionable features. pose of making a little Presidential capital for Judge Douglas or President Pierce. We shall be greatly disappointed if Senator Mason, who renewed the Missouri Compromise in the Texas boundary bill, shall feel himself authorized to break faith with the parties to the compact. We shall also be disappointed if Senators Bell and Badger cower before the clamors of the day, and agree to leave nothing of the Measures of 1850 except the fugitive slave law. We yield to no man in our devotion to Southern

rights, but we estimate Southern honor still higher, and shall in no wise sacrifice the latter for the sake of the former. We shall have no lot or part in a breach of faith. As we made one bargain, let us stead by it, like men of truth and integrity.

RICSMOND, February 11, 1851.

Capitol.

Throughout the progress of the whole affair, the Whigs preserved a strict neutrality, a most provoking coolness, leaving the "harmonious" to fight their own battles, and settle their own feeds, without interference from those whose wishes have as little influence as a ma-tive of the South Scalislands might be presumed to have. I believe there are a "few names in Sardis who have not defiled their garments," and they were "put through," but the others were submitted to the tost of an examination by the brotherhood, and have not yet passed the rubicon.

I have observed in our county papers an annumerounent that held respect to the country of the country in the countr

that the bill proposing to release the State's interest in the Winchester and Potomac Rail Rood, had become a law. Such, I am happy to say, is not the fact; nor will, it, I trust, pass the House without the incorporation of some wholesome amendments. The money feature seems to have great attraction, for the majority are azious to get hold of that indispensable actions, there is may be applied to sundry other improvements how seeking the aid and the credit of the state. They seem more over to be willing to me ae the best of a bad bargain and take the eighty-th ce and a third thousand dollars while they can get it, lest it should finally be joined to that sinking for d of two hundred and thirty-one thousand.—
If the bo one redeeming feature in the new Constitutie, or one provision better than another, it is that which forever prahibits the Legislature from squandering the property of the State, by reliaquishing into the hands of the stock for this purpose—the exclusive right of proper-ty in that which was created by a fund wrung from the

ockets of the people. I have said that the bill in question may pass, but not it is hoped without adequate protection is given to the people of Jefferson, who have suffered from the exac-tions of a company that has violated the law, and is still guilty in this particular. It has been charged—upon what is deemed good authority—that the company has been in the habit of discrimination—not only as regards tell—but in respect to desputchers, produce with reference to the point of destination; thus violating most palably, the very first obligation imposed by the Code of Virginia upon rail road companies, viz: that, "the property of all persons shall, as far as practicable, be insported in the order of time in which it shall be delivered, or offered." They have been guilty of another infraction of the law in the amount charged upon travel; the maximum rate being "not exceeding six cents per mile," when they have until recently, "narged two dollars for thirty-two miles; just eight coats more upon each passenger than constituted a lawfu, charge. If the tariff of prices which I have seen be correct (and

I cannot doubt it) they are now guilty of a most flagi-tious wrong, not only in the inequality of charge on freight, as it respects distance, but in the unserepulcus disregard of law. For instance, the cost of transportstion is fixed at the following rates, viz: for produce and other articles, except gypsum and lime, not exceeding eight cents per ton, per mile; and of gypsum and lime, not exceeding four cents per ton per mile." And yet they charge for miles, or less, fifty cents, just eighteen cents per ton more than the law allows.

Can it be a matter of any astonishment then that the people of Jefferson, who know that these abuses have existed when the State had a pecuniary interest in the road, fear the consequences of a withdrawal of that in-

The manner in which the alleged discrimination of three cents against the C. & O. Canal, is accounted for, is a very flimsy pretext indeed. Any one who is acquainted with that end of the road, knows, that there are two depots near the end of the bridge on the Maryland side where produce can be readily unleaded, and without "a day's detention of the cars," there being always competition among at the boatmen for the tomage Another abuse which seems to have escaped attention in the discussions which have been had upon this subject, and which might be regarded as a "discrimination in faand which might be regarded as a "discrimination in in-ver of Winchester,"—is that practised upon the travel-ling community in disallowing them the opportunity to dine at Harpers-Ferry, which is the proper point, con-sidering the hour of arrival, and the necessary detention in changing the mail, a few minutes longer would give the most ample time and exempt the traveller from the wing over a slow road on a long fast. Now that the company are asking favors. as though they had in good faith and a proper manner, discharged their obligations fully, it is hoped that they will see the propriety of endeavoring to concilial erather than excite the public against thom. But this short road

has furnished a theme much too long, and I will not weary your readers further. The work of legislation progresses slowly, and from present indications, a great amount of business will be left undone. Several hundred bills (and among them that for our turnpike, I fear) will not be reached. This misfortune may be attributed to the number of large schemes which have necessarily consumed so much of the time of the House. Propositions, or resolutions relating to them, were first introduced, and had therefore the precedence, and as a great many members felt called upon to deliver themselves of speeches, in "thoughts that breathed, and words that burned,"-or would have burnt, if they had not got out, -business has been greatly retarded. Add to this the jealousy with which the rival factions, by which I mean the representatives of the different interests, watch each other, unwilling that the projects of one should get the start of the other, and you have one of the secrets of slow legislation. First, the Covington and Ohio bill desupied a large part of the guage, which occupied four or five days; the next was to consider the propriety of appropriating the sum asked, that was reduced from five millions to three, and then to two, and after several days more of maneuvering, was defeated. So that it is now just where it was the first day of the session. The only large appropriation bill that has met with success yet was that for the comple-

tion of the Manassas Gap rail road. The Central read applied for a loan of one million and a half, but by a vote of the House last night, a bill was ordered to be engrossed, allowing them but one-third of that sum. As a part of the laan asked was for the purthe soothing weed! Another was by a wochase of a lot and the erection of muitable buildi this city, and the bill requires that the money shall be though her husband was totally burnt out. expended in continuing the road west of Staunton, our Richmond friends seemed not to be pleased either with the short allowance givez (albeit a pretty good sum) or the Lion's main, either as ally or as foe, shall be

with the restriction imposed.

The State has certainly dealt bountifully towards Richmond, and it is time that more destitute portions should receive a measure of public patronage.

Judging from the indications that have been given, I incline to the opinion that Landers will not appropriate a sum that will seriously embarrass the treas-

ury, or increase materially, if at all, the present rate of question, were received to-day. They met with a bet-ter fate than their predecessors, for the House, by rather a decided vote, determined to give them to a special committee. This is treating the petitioners as they deserve, and have a right to expect. Jefferson was repre-

sented again by ninety-five signatures. A most appalling number of fires have conrred in this city recently; indeed I have never in the same length of town to pieces, slaughtering more than a thousand time in the largest cities of the Union, witnessed any of its citizens and giving to destruction an immense thing like the same extent of calamity in this particular. Every day, or night, one is startled or around by the by the unpretending column, which the gratitude of their fellow-citizens reared to the memory of those gloomy foreshadowings of impending calamity, are suddealy awakened to a sense of the most desolating ruin with which the devouring element can overwhelm a JEFFERSON.

SLAVERY AGITATION.

We are now at sea again on the slavery question. Ambitions demagogues have succeeded in breaking the bonds of peace which were made in 1850. Patriotism is lost in selfishness and corruption, and the peace and harmony of the coun- | so, the strictest neutrality during the threatened contry is prostituted for the base purposes of personal aggrandizement. It is deeply to be regretted that our national councils are filled with men of low cunning and corrupt motives, in place of statesmen and patriots. If there ever were a question the agitation of the question should cease. With

Yet demagogues only one of which I am aware that has proved for corrupt motives are willing to re-open the prominent and really benificial to the people is that wounds, and awaken again the fierce madness of We can trace this whole matter to no other | dom, than the former bonds with which she was resource than to the Washington Union and is stricted; but here the change has been palpable, echoes, which gravely declared that the Balti- permanent, and will ultimately prove, I have no more platform neither expressly approved nor dis- the abertive efforts upon the part of Gleswick and il works is compatible with the public interests and approved the Compromise measures, therefore, a Holstein to withdraw their allegiance from Denfraud was practised upon the American people to mark, and which, had they succeeded, would, serve party ends, but not to afford any security a- in all probability, have left them in a much worse gainst farther agitation. FOREIGN CORRESPONDENCE.

COPENBAGEN, January 10, 1854. DEAN BELLER: On the 16th of December last I miled you a letter, I presume it will come to you with the early Spring birds, some time in March or April mext. When this one will reach you, would purple the cutest "medium" to tell. For all that cold weather and hard winter which we have been promised so long, and which I really had begur to hope would not come at all, has made its pearance all at once, and in mighty force. For the last four days we have had a continuation of rain, sleet, wind and snow; the two first day? having been occupied principally, with rain and sleet, but for the two last snow-and wind have usurped the place of every thing tise and fall and howl with a perseverance and violence unknown in more Southern regions. I told you, in Lay last, that the sun, in his best days, was out a reeble orb up here, but at present I think that Le has given up the struggle and gone into winter quarters, to economise his fuel and husband his beams for the two months and a half of summer which we are promised after a while. I havn't seen bim for so many days that I shall require an introduction when we meet again. The effect of this severe weather has been completely to cut off all communication between this Island and the rest of the world. The boats between this and Keil ceased to run several days ago, and now the Baltie is frezen as far as the eye can reach, and all the shipping in the harbor is fast bound, for the balance of the winter, I presume. Nothing can be more desplate than the ppearance presented by this huge frozen Ocean with s vast fields of snow and ice, over which the bitter winds of the north sweep with irresistible force, and where the only signs of life are a few starving seamils and emaciated ducks, wheeling in solitary it around some chasm in the ice, and occasiona ttering a wailing cry as if in deprecation of the

True, the people, for many years past, have been forturate in their Kings, and no arbitrary acts of cruelty stain their history. They possessed the power nevertheless. But the constitution 1848 virtually restored all power to the people themselves; and what is even more remarkable, it "Riesday" or Diet of the State, composed of Two Chambers or Houses. The "Landsthing" or upper House is composed of fifty-one members elected for six years, one-third of whom, as in our Senate, retire every two years. The Lower House, called the Folkething, is composed of one hundred members, elected for three years. Each member of both these ses, receives from the Government three Rix dollars perdiem (equal to about \$1.62; of our mo-

But the King possesses the veto power unlimited, and may dissolve the Diet when ever he thinks proper. This power he has only exercised twice since the constitution went into operation, and upon an extraordinary consion. The Salique Law is in force in Deamark, and the present King having no sons, it was deemed important to appoint a successor, and in their attempt to do this the Houses were twice dissolved by the King before they could come to terms. In case of such a dissolution, a new election must be held, but the same members may be elected. The last election, held in March last, shows the following members returned to the Folkething, viz., 3 Counts, 7 Professors, 14 Civil Employes, 10 Clergymen, 5 School Ushers, 2 Orders, 3 Tradesmen, 2 Editors, 37 Peasants, 11 Country Schoolmasters, 4 University Graduates, without occupation, 1 Operative This Diet is in session at present, and my curiosity sometimes leads me to listen to their proceedings, which are very interesting-if one could only comprehend them! They certainly are a very injustrious, economical and managing peo-ple, and, I assure you, I have not seen tour beggars since I first reached Copenhagen, nor have I seen four drunken men; though I am told that there is a great deat of spiritous liquor made in the county, and that the lower classes are pretty much given to the use of it. If this be true they must be remarkably goodid infers, and able to carry a vast deal, or else they must get drunk altogether in secret, for less appearance, fewer signs of drunkenness are not to be found any where else that I have been. The amusement of sleighing, which does not seem to be very fashionable here, is managed in rather a singular manner. The sleighs are, generally, very small, only large enough to contain persons, and the driver instead of sitting in front, as with us, stands up behind the sleigh either on the runners, or on a small platform constructed thetween them, and in place of a dasher, a sort of get, resembling a large sofu-tidy is placed on the rungs of the horses and attached to the lower part of the front of the sleigh. DR. DE LANEY'S Curative Instrument, THE only infallible cure for that dres iful dis-Rease known as Spermatorrhea or less luntary
Nocturnal Emissions, so harassing and destructive
of so much mischief to the nervous system incapacitating the man for business, society, the matri-

mony.

This Instrument is simple, comprehensive, and never-failing, and may be used without the nlightest inconvenience or the knowledge of the most intimate friend. It is to be used externally producing no pain or injury whatever, a preventing any once from attending to his busine and wight in use not a single emission can tal lace, ingregrating the organs, in a short time, such an incent that they regain their primitive poor of retention the loss of which, caused by early abuse, is the lisease in question, and the cause of the lisease in question, and the cause of the thousand commitant complaints, viz.: Nervousness. Prostration, Dyspepsia, Pain in the Head and Irimness of Vision, Weakness of the Back and Lower Extraprises, Atfections of the Eyes, Impotence, Parages of the Face, Premature Decline of Virility, Windeness of Memory and Power for Mental Application, Dejection, Aversion to Society, Timidity Self-Distrust, Love of Solitude, &c. All there is coplaints invariably disappear as so on as the source is stepped from which they emanated.

This Instrument has been examined are approved of by the highest authorities in Europe and America, issuecommended by the most preminent Physicians of all countries, as the only certain probability for the countries of the only certain remedy existing for those complaints, and has now completely superseded the use of drugs, the bougie', cauterization, &c., not to mention the thousand acvertised nostrums of the day, as cordidae, antidotes, &c., &c.

Fe it also remembered, that those compliants are but little understood by the profession in general, and never will, stop those losses, which, E allowed

one of respectability and of prefersional attainments should devote his attention to distases which people of every description pretend to cure so easily. If, however, but the one thousandth part of the discress these people bring upon society were known, a very different opinion would be formed. And it is not only the present misery and dejection, preying on the mind as well as the body, that is deploted, but some are of such a nature as to affect pasterity, and even to destroy the reproductive faculty, altogether. It is a fact that, when not properly treated, they may remain so dormant in the constitution as on posterity; yet, if properly understood, are most easily and speedily removed. The above, so ingeniously contrived instrument, will doubtless, ina great measure, contribute to check the evils of quackery, so prevalent in this class of diseases, throughout the Union.

The price of the complete instrument, carefully secured against all observation in a box, is only 310. It can be sent by express, to any a feress in any part of the United States, Canada, &c., acearding to o der, accompanied by full directions, the exponses, even to the remotest parts of the

coantry, being very trifling. The unexampled success this Instrument has obtained since its introduction in America. has induced some unprincipled persons in New York, Philadelphia, Albany, Boston, &c., to get ep some ridiculous things, called "Instruments," which, however, bear not the slightest resemblance, heither in form nor principle, to my own invented, long tried, and universally approved instruments, and which are as similar to them as night is to light will be prosecuted to the fullest extent of the law. tute and Chemical Academy, ALDIE, LOUDOUN CO., Va .. January 26th, 1853.

MR. GALLAHER-Dear Sir: The enterprising farmers and friends of improvement in Virginia will, doubtless, be gratified that I have associated with me Mr. James H. Gulick and Mr. Harman Bitzer, two practical and successful agriculturists, for the purpose of establishing an Agricultural Institute and Chemical Academy in this County .-The experimental Farm will contain 320 Acres, which will be cultivated according to the true prin-ciple of science, and in which many interesting and important experiments will be made. And efforts will be made to obtain seeds from every part of the United States and from Foreign Countries, In addition to two commodious dwellings already our the estate, a new building has been designed 180 by 30 teet. One half of which will be erected the present year. The Laboratory will be foreished with an extensive collection of the largest, the handsomest and best apparatus in the United States. The museum will contain Geological specimens, Minerals, Fossils, Shell and also Models, Draughts and Catalogues of Agricultural Machines, Implements and Tools. And for the conveadornment of the "Outward Man," will be found in nience of making and repairing apparatus a workhis selection. His stock embraces Coats, Pants, shop will be fitted up with Turning Lathe, Slide Rest and all necessary tools for working in wood, iron and brass. Full courses of Lectures will be delivered, which will be illustrated with several thousand useful and interesting experiments.

The instruction will be thorough and practical, embracing Mathematics, Mechanics, Chemistry and other branches of Science and Act, in their application to Farming and Farm purposes. Particular attention will be paid to Agricultural Chemistry-Preparation of Pure Chemicals-Management of water courses-Principles of irrigation -Analysis of Soils-Construction of Farm Buildings-Estimates of Lumber-Planing, Budding, Grafting, Pruning and cultivation of Fruit Trees -And in fine every thing important to the practical farmer and men of business. To complete the designs of this Isstitution will require an outlay of 40 to 50 thousand dollars, and if it receives that patronage which is hoped for and expected, no expense will be spared so make it the best institution of the kind in the World. If now the advocates of improvement are really in earnest they will take this enterprise by the kand and help it along, by giving a good list of students at the commencement. It is heped that every county in the State will send at least one student the first session. And that the different Agricul aral Secreties will ascertain how many students can be sent from their respective districts and forward a list of the same by the 1st day of December next. The Institute will be opened for the reception of Students on the 1st of March, 1854. Terms, inclu-
